Thread: [My UB keeps changing without me changing it?](#)

Wirt - July 26, 2015, 2:06 pm

This happened yesterday for like an hour or two then stopped. Then now it's happening again.

My userbar keeps changing from L'appel du vide to L33T. I change it back, but every like 10 minutes or so it goes back to L33T.

I don't have any userscripts installed either.

That's doubtful because I was posting in that subforum and refreshing like every couple seconds or so... unless he's readding me right after removing me.

Cryptic™ - July 26, 2015, 2:07 pm

A group leader removes you and adds you back right away.

Source: Roger does it to me sometimes ?

inb4 OP is hecked and someone is fucking with his acc.

It's probably just a cache error on your end.

Or a group leader might be removing you. I don't know all that much about groups :/

My account can't be hacked because I have 2fa enabled lmao

Anyways, the cache error doesn't seem to be possible because I recently changed browsers, and this browser I am currently on has not seen me with my l33t UB on.

Hm. This might be it then. I wonder who could be removing me lmao

Roger Waters - July 26, 2015, 2:11 pm

Are you using HFES? If so, do you have it set so that the Userbar changes to another one?

I am not, as I said in the OP I am not using any userscripts. I just recently changed browsers.

Then a leader must be removing you from the group and re-adding you back.

Hm, alright, thanks. I will try to get to the bottom of it.

Thanks again.
