Thread: [What VPS shall I buy for DDoSing](#)

**KawaiiCharizardeh** - July 27, 2015, 5:37 pm

I want a private putty booting vps because I don't like relying on someone else and its fully accessible by me.

What vps should I buy?

**UnNullRouted** - July 27, 2015, 5:39 pm

I can sell you a good VPS, perfect for DDoSing for \$12/month

**Seigee** - July 27, 2015, 5:39 pm

Vps will most Likely ban and limit your port I suggest w dedi but if you really want a vps I suggest vps.fm

**KawaiiCharizardeh** - July 27, 2015, 6:32 pm

**bluedragon123** - July 27, 2015, 6:33 pm

i was just checking out blazinhost

**BRAVO** - July 27, 2015, 6:52 pm

Op make sure the VPS you plan on buying is spoof-enabled ?

**Supreme\_** - July 27, 2015, 6:55 pm

nearly all VPSes will suspend, if you dont wanna worry about wasting your money buy a stresser or a dedi server from fluffy

**Seigee** - July 27, 2015, 7:04 pm

**J?son** - July 27, 2015, 7:45 pm

None. You should never use a VPS to ddos with. You will slow down the whole node/other costumers.

Buy a dedicated box that allows spoofing.

**ItsFluffy** - July 27, 2015, 8:00 pm

root posted it first, don't use vps, pointless and a waste of money overall  
if u want a server that will work check my threads, #1 seller for good reason

**Seigee** - July 27, 2015, 9:04 pm

Why are people negging my rep for giving out a site

**illuzionzz** - July 28, 2015, 5:35 pm

ecatel...but depends if your trying to DoS with perl or python script. You will need a Spoof server bro. Better off Buying a Botnet spot for \$15 Dm me on Hackforums

**Darksidefox** - July 28, 2015, 7:18 pm

If Layer7 (Websites), buy a XML-RPC list and script. For executing a Layer7 attack you can use a Blazingfast server.

If Layer4 (Home connections, game servers...), buy a spoofed server, get a NTP, SSDP, SNMP... script and a list an ddos with it. But remember, you must scan for a NTP, SSDP, SNMP... list. Hope I helped you out a bit. :P

**Seigee** - July 28, 2015, 7:22 pm

BF has less tendency to suspend if u buy a medium to higher priced dedi... makes it more worth their while

**ItsFluffy** - July 28, 2015, 8:24 pm

(Jul 28, 2015 08:16 PM)Seigee Wrote: [\[CITE\]](#) True.but they'll still ban there entire network is on 1 node

Btw they don't sell dedis as there on 1 node of  
all good information to have thanks for the input

**theonemc** - January 20, 2017, 11:53 am

sell good vps witch you can ddos for how many time you want add me on skype : lordulminecraft

**K0dakBoii** - January 25, 2017, 12:50 pm

i recomend virpus. their 5\$ vps' hit like 50k pps.

**playet** - January 25, 2017, 12:52 pm

grave dig much?

**FBG Duck** - January 27, 2017, 9:51 am

"private putty booting vps"

Your actually cancer. Most vps's will only hit at max 1gbps and will probably suspend you immediately best bet is to buy a spoofable dedi or host a net on the vps

**deathking112** - January 28, 2017, 2:01 pm

selling ddos vps with upload from 200-700 add me on skype: deathking112
