You would be better off pasting up one and using PolyLoader. Not even kidding. Anyone who offers you one here probably did the same.

I'm not kidding at all.

Try anagoly's <https://hackforums.net/showthread.php?tid=4880794>

I tested it. It works good.

Analogy can't code at all, too bad the moderators removed all of my posts regarding that.

On-topic: If I had a webcam I'd show you how to actually bunny hop, it's pretty easy but the videos describing it are a bit hard to watch.

ty the cyber bully - July 27, 2015, 6:05 pm

bind mwheelup +jump
bind mwheeldown +jump

Scroll, move A/D along with your mouse (ie; If hitting A, move mouse to left then to middle. Then hit D and move mouse to right then middle).

unknown2me - July 27, 2015, 6:05 pm

Keep it old school and check out mine

(Wow first time i've suggested anything of my own, wtf)

(Jul 27, 2015 06:07 PM)Dark??? Wrote: [\[CITE\]](#) Guys i am really good at bhoping myself on 128 tick. I do alot of kz and shit, i just want to mess around on 64 tick mm with a bhop cheat.

Also i want a simple bhop cheat, that doesnt require you to do alot of shit, ive had yours once it was fine but to advanced.

Oh and i did code my own bhop cheat in vb.net but i dont trust myself with detections lol.
We've restored the old theme now; just launch, choose matchmaking and go

I personally just use mwheeldown.

(Jul 27, 2015 06:14 PM)Dark??? Wrote: [\[CITE\]](#) Do i still have to fucking bind shit?
I think you still need to bind mouse3 to jump.

Bind mouse3 +jump
Unbind space

Don't see whats the difficulty in it tho'
