Thread: [Compleat Private Stresser Source - UNSOLD EVER - \\$25 - Stop Button - Support Features!](#)

Down Quark - July 27, 2015, 6:47 pm

So, I have spent the past week creating a new, nice looking source.
You can see the source [here](#)

For full access use the account
hfaccount
password

This source includes
FULL Support panel for clients and admin
FULL admin panel to modify news, tickets, ect.
Layer 4 and 7 API configuration!
Example tools provided, domain resolver, friends and enemys, ect.
Viewable logs for attacks and logins
Any requested updates for up to 3 months!
and the famed STOP BUTTON!

Preview

I am only selling 5 copys for \$25 each. Let me know!!!!

PLT ? - July 27, 2015, 6:50 pm

The register page doesn't look done. It's just a HTML template.

Other than that it looks good.

Down Quark - July 27, 2015, 6:51 pm

reg.php sorry, it is new and i forgot to rename that page!
Thank you

Dont miss this amazing source!!!!!!
Influence your buyers with this premium source!

Massive vouch for Down Quark.

This source is amazing.

int main() - July 28, 2015, 10:21 am

This is a retheme of vdos v2.0 tho.

raider101 - July 28, 2015, 12:24 pm

You can't use the word sexy when its ugly asf and isnt aligned correctly

Down Quark - July 28, 2015, 2:47 pm

(Jul 28, 2015 10:21 AM)Nullster Wrote: [\[CITE\]](#) This is a retheme of vdos v2.0 tho.

I will haggle the price for anyone who wants to shoot through my logic.

I did spend around 6 hours on this and would like to get \$100 out of it without selling out many copies.

Lowered price to \$25! :)

I WILL be upgrading this source.

Each purchase comes with 2 free upgrades!

Legion - July 30, 2015, 5:39 am

OP was coding us a source for EraStresser to use, didn't know it was this immature retard.

He tried to sell me a free source (This stresser is a rip from ShitStresser)

He also got butthurt when I asked him to change some stuff, go to hub2.php and you'll see the change. He quit skype because I said that hub2.php is better looking than hub.php is.

definitely deal with caution with OP.

Holy fuck you are idiot.

You told me you liked hub2.php better which is the unthemed hub.

Then when I told you it had no theme and I could just sell you the public source.

You got really pissed off. If you didn't want me to sell you anything fuck off!

I literally did not have to give you anything for free.

Shitstresser isn't even the fucking real name XDDD its vDos 2.0..

I hate people like you.

Connected - July 30, 2015, 10:20 am

Login information does not even work.

Down Quark - July 30, 2015, 10:29 am

(Jul 30, 2015 10:20 AM)Connected Wrote: [\[CITE\]](#) Login information does not even work.

That is because someone who is not so smart wanted to change the password.

Should work now.

Mr Whiskey - July 30, 2015, 10:32 am

Looks really nice, I'm not into the whole SST shit, so I don't know if it's a copypasta of whatever stresser, but it looks really clean. I like it.

Down Quark - July 30, 2015, 10:48 am

I have to copy the PHP from the old source.

Paste in into the new source, then edit the HTML so it works.

Genicus - July 30, 2015, 10:51 am

Not sure if login succeed or login successful
