Thread: [Need A Lua Coder For A Gmodz Server And Dark RP](#)

ItsSenpaiBish - July 28, 2015, 6:48 am

Looking for a lua coder that enjoys lua and or haves fun doing because I am out of funds to pay for a coder/dev but if you do code for me when the servers get more populated you will receive about 35% of donations :D Add me on steam if interested ??Senpai??

evarand123 - July 29, 2015, 1:20 pm

I would try to watch out because some people could take over your server or they could cause more problems

Limit. - July 30, 2015, 3:29 am

This is really risky for who ever is doing it. I 90% guarantee that the coder who does this is looking forward to the server becoming popular. Just like every DarkRP server it dies down and no one really works on it anymore. I'd suggest you build an audience, or try a different gamemode in general because DarkRP is the most popular and people usually only play on the main ones which everyone else does.

I have the gangwarsrp BETA, 1.0, and 2.0 SQL tables aswell if you want proof pm me, I'll look into selling the files for a price :).

JumpT - September 24, 2017, 5:45 am

Hackforums might not be the best place to find Lua coders for your darkrp server. It might be a good idea to first purchase some pre-made scripts online since every darkrp server is doing that anyhow. Saying that, darkrp is incredibly difficult gamemode to get a foot in since there is loads of competition. Good luck though, I would help but I would have to see some sort of success first like stated above.

NiteNite - September 27, 2017, 4:09 am

dont do it on hackforums dude. someone WILL install a backdoor, and someone WILL take over your server.

posterierman1 - October 3, 2017, 12:58 pm

There's a few thousand people on steam named Senpai, you're gonna need something else for people to find you with.
