Thread: [Spotify Voice Control | Control Spotify using your voice!](#)

MD5 - July 29, 2015, 9:04 am

Hello HackForums,

Here's a little tool I made, Spotify Voice Control.

As it's name already says, it allows you to control spotify using your voice.

It's very easy, you just click the "Start Voice Control" button or the notify icon and you say "Play SONGNAME". It automatically loads all songs from the user's playlists into the program.

(rar password = md5HF1112)

I'm sorry for the 'ugly' code.

unSatisfied - July 29, 2015, 9:36 am

Very cool, great job!! I will most definitely check this out later!!

?ovu - July 29, 2015, 7:04 pm

Very cool, I'll be PM'ing you for the source.

Carlsson94 - July 30, 2015, 12:47 am

This is pretty dope, good work.

Sent you the source!

Have a nice day ?

lehterdotcom - July 30, 2015, 3:56 am

This seems really cool, do you mind if I get the source?
Always wanted to learn coding and this seems like a pretty cool thing to look at

Sleeping With Sirens - July 30, 2015, 10:21 am

Nice release, sounds like a good project.

HighARc - July 31, 2015, 5:28 am

Sweet! Nice program I will try this bad boy out when I get home!

Exodi - August 14, 2015, 10:23 am

This is useful for others, but I won't use it because I only use Spotify on my iPhone.
Good share tho :)

Nexus - August 30, 2015, 11:11 am

Most likely a virus as this is the actual virustotal scan:

<https://www.virustotal.com/nl/file/4c2fcf99782caa827065f86065db5f60db3af6caf70424e41841a617b50dc88e/analysis/1440958224/>

It's the same scan as I posted only scanned later. Also, why would I make it a virus if it's open source? Kinda stupid not?

Nexus - August 30, 2015, 11:30 am

Only your scan has 1 hit and mine has 24, bit strange...

Damn what a shame. This program sounded really cool, but ofc it's too good to be true.

Yeah, idk why they see my program as a virus, only thing I did was compile the clean source in vs and merge some decencies with ilmerge. It's not even obfuscated. Anyways, if you'd like to see the source code be sure to tell me, I'll be glad to show you this is legit.

(Aug 30, 2015 11:33 AM)Professional Leech Wrote: [\[CITE\]](#) Damn what a shame. This program

sounded really cool, but ofc it's too good to be true.

Well we're not even close to "too good to be true" here. It really wasn't that hard using the spotify local api and the windows voice recognition api. If you're not convinced this is legit I can send you the source code. It's a 100% clean.

asdfghjklwertuio345678 - August 30, 2015, 7:19 pm

It looks nice, but everyone says it's a virus... I will have to look at the source if it's not heavily obfuscated. Anyway, this was a good idea and if it happens to be a true program. Did you use the api or did spotify not have one?

Drizzy?? - August 30, 2015, 7:20 pm

Not trying to take over OP's thread, but I made the same thing a while ago if you don't trust OP's.

I'm far too lazy to go over source codes and pretend to understand them, all I know is there's something fucked if it's pulling 20+ detections, and Drizzy's only has 1.

kraz - August 30, 2015, 9:11 pm

Nice work dude keep it coming thats such a nice app

MD5 - August 30, 2015, 10:50 pm

You can look at the source as I didn't obfuscate the exe. And yeah, it's using the spotify local api to control the spotify client and the web api to initialize all playlists into the speech api's grammar

(Aug 30, 2015 08:37 PM)Professional Leech Wrote: [\[CITE\]](#) I'm far too lazy to go over source codes and pretend to understand them, all I know is there's something fucked if it's pulling 20+ detections, and Drizzy's only has 1.

Well, thanks anyways for leaving that -3. Trying to contribute to HF brining out free software, what do I get? Kids saying it's a virus. Any other member that doesn't trust me (probably because of my current rep) can decompile the EXE himself as I didn't obfuscate it at all. I'm not trying to infect anyone, just trying to contribute with some cool software.

(Aug 30, 2015 07:20 PM)Drizzy?? Wrote: [\[CITE\]](#) Not trying to take over OP's thread, but I made the same thing a while ago if you don't trust OP's.

<https://hackforums.net/showthread.php?tid=4900770>

Took a look at your tool and it seems nice! Can it play specific songs? If not, it's not hard to add by adding all song names in the user's playlists to the speech grammar.

Mr Whiskey - August 31, 2015, 5:52 am

(Aug 30, 2015 10:50 PM)? MD5 ? Wrote: [\[CITE\]](#) Well, thanks anyways for leaving that -3. Trying to contribute to HF brining out free software, what do I get? Kids saying it's a virus.

I didn't give you -3 for this tool, because I didn't look into it, I did that because your suggestion was retarded, as stated in the rep itself. People are saying it's a virus because it's pulling 20+ detections. That's not false-positives. You either fucked up something in the code and it's causing the detections or it's infected. Drizzy's tool that does the same thing has 1 detection, likely a false positive. You can't have -20 rep, and upload a program with 20+ detections on virustotal and expect people to not give you shit over it.
