Thread: [\[Updated\]\[New Features\]Tinchat Room Helper 3.0\[Updated\]](#)

TC_Coder - July 30, 2015, 11:04 am

Tinchat Room Helper 3.0

To get the bot to work, sign into the account on a webbrowser and go to any random room. Once there manually solve the captcha. At this point you'll be able to run the bot!

- Coded In VB.net
- Works just like Niggabot
- Easy to use controls
- Obfuscated Code
- Working as of 7/27/15

Features

- Anti Cambot and Spam
- Ban all, Kick all, and Close all
- Nickname Ban Strings
- Chat
- Advertisement
- Commands
- Visual Chat Colors
- Save Chatlog Button
- Auto-Mute Broadcasters
- Timestamps
- Profile Support NEW FEATURE
- Profile Ban NEW FEATURE
- Topic Changer NEW FEATURE
- Bug Fixes NEW FEATURE

Commands

!ban
!kick
!close
!yt
!ytclose
!resolve (Skype Name) NEW COMMAND
!trace (IP Address) NEW COMMAND

Must have .NET Framework 4.5

Download link: <http://www.microsoft.com/en-us/download/...?id=30653&>

Tinchatbot 3.0

OakIsKass - July 30, 2015, 12:04 pm

i pm you ... can u pm me back ?

chrisdaking - July 30, 2015, 1:45 pm

tc_coder pm me we can bring together cambot back ;) i have the source

#edit: bot dont work still is guest when he connect and you can do nothing no ban no close no text
NOTHING

i guess you forgot the Captcha bypass bro

nolapola - July 30, 2015, 3:05 pm

There is no recaptcha BYPASS - you can however get the bot's to connect by signing into your account and loading the room as usual in your web browser making sure to solve the recaptcha. Then attempt to sign in using the bot and it should work.

OakIsKass - July 30, 2015, 3:44 pm

Read the top of the thread. Go to a room first fill out captcha then trying bringing in the bot.

Dizazta - July 30, 2015, 7:17 pm

Maybe I'm doing it wrong but this isn't working. I sign in via the browser in a random room, then sign into another room with the bot (without mod). It connects but it can't send anything.

?TOP KEK - July 30, 2015, 7:19 pm

You are absolutely retarded.

Cancer. You've given me Cancer. Read the top of the thread.

Dizazta - July 30, 2015, 7:34 pm

I did. And I solved the captcha exactly like it said to do. I don't care about the mod stuff.

?rost - July 30, 2015, 7:39 pm

/sigh You need to sign into the room on the account your bot is using, and complete the captcha. Then when you leave the room and log into another account, the bot auto bypasses the captcha, since it's done by account and not cookies or IP.

hackit1 - July 31, 2015, 7:03 am

You need to sign into the room on the account your bot is using, and complete the captcha. Then when you leave the room and log into another account, the bot auto bypasses the captcha,

did that thanks but is name will not come up guest only not name

Stop wasting your breath helping these morons. They are unhelpable.

Stop pretending the instructions in the OP weren't unclear. Those instructions implied that you could go to any random room in the browser, do the captcha, and have the account cleared for botting in any room.

The reality is that you have to go into the room you want while signed into the account, do the captcha, leave the room (obviously), then you can finally use a bot in that room. And I've found it doesn't work 100% of the time, and if you mess it up even once, it kicks out the bot completely for a while no matter what you do.

?rost - July 31, 2015, 2:54 pm

I don't understand how you can mess up the captcha... But I'd assume you get a short IP ban or something from trying to use the bot if you've failed captcha. Regardless, it's been patched so it doesn't matter.

lord_cipher - July 31, 2015, 3:36 pm

can i have the bot sir i need it for my room.

pm you blblblblblblblblbl

hackit1 - August 1, 2015, 1:25 am

it will only enter as guest not as GODBOT

WHY WOULD THAT BE ?

does the bot know any thing about SEA FOOD lol

<https://gyazo.com/f2f2913f91109d05e8f67a878e01a92d>

i can get it to load up ok but no GOD BOT as its name

any help on this ? regards

take a look at this and tell me can any one fix the new captcha looks like no one knows how to get around it

<https://hackforums.net/showthread.php?tid=3799080>

Don't tell him that, you're not the one he spams with PMs about problems. ;-;

Omniscient - August 4, 2015, 1:27 pm

Post the MD5 or SHA file checksum. Reports are coming in this is backdoored.

?TOP KEK - August 4, 2015, 2:16 pm

This has been brought to my attention from a few sources as well.

nolapola - August 4, 2015, 3:33 pm

What would one expect from obfuscated code from a source that is fairly sketchy?

veox0569 - August 18, 2015, 1:07 pm

This no longer works.lalalallalala

Darkode - August 18, 2015, 5:11 pm

Let me catch you backdooring people, Ima gonna put a foot up your asshole. Watch not even omni will save you from this one.

?rost - August 19, 2015, 6:59 pm

I wouldn't suggest running this to anyone. In case some of you are still trying to get it to work.
