Looks pretty good! Try and share it on reddit if you haven't already, I'm sure people there will like it.

csgo_player - July 30, 2015, 5:43 pm

That's pretty cool. Did you make this yourself or is there a website where you use colours and can apply them to a controller?

I'm not gonna lie that looks sick af. Asiimov is the best skin I've admired so far. It looks fantastic on a
controller. Nice job!

Ellie Goulding - July 30, 2015, 8:22 pm

You should post this on Reddit! People would love it there!

Maybe Reddit.com/r/GlobalOffensive or Reddit.com/r/Gaming or Reddit.com/r/XboxOne

Holy moly! That is one sick design you got! Can't wait to see more.

Andy Botwin - July 31, 2015, 5:14 pm

nice op, this looks very similiar to the Titan Xbox One controller you can already buy :)

Dowls - July 31, 2015, 5:14 pm

People saying that they'd love it over on reddit... they probably wouldn't. It completely destroys the logic of being a CS:GO elitist.

Nice design but the thing it's on is completely irrelevant to CS:GO. Yes, you can use an xbox controller, no you'll not be able to play CS:GO above silver with one.

The Supreme Leader - July 31, 2015, 5:17 pm

that honestly looks boss

i would use it

I appreciate that you like the design I made and I completely understand what you mean I couldn't imagine playing Csgo with a controller would feel to strange to me.

The idea is pretty cool actually, poor executed imo but it was a really nice try :)

Defy_ - August 2, 2015, 11:27 pm

Pretty low quality for someone who has graphics in their signature...

Wake - August 2, 2015, 11:58 pm

Pretty low quality seen as It was one of the first things I attempted to do and It wasn't even made on Photoshop It was made on a free editing software thanks for your feedback though.

skelly76 - August 3, 2015, 2:58 am

Not bad, those hexagons don't match the Asiimov though. Also why a xbox one controller when csgo is on steam lolol (not many people use controllers in my experience). Could've made a mouse. ;)
