Thread: [\[NEW STUB WITH FIXES\] Emissary v3B FUD AGAIN, Admin and Non Admin Stub - \[No \\$harecash \]](#)

The 7th Sage - June 20, 2010, 12:17 pm

[img=500x500]http://i45.[censored].com/29zpjxy.png[/img]Official

[img]http://img89.imageshack.us/img89/7453/29076353.jpg[/img]

-> Pidgin Stealer had some error. Fixed

-> Keylogs were fucked up if the victim typed fast. Fixed by changing the whole keylogging method.

Now its 5times more efficient than the previous keylogging method.

-> Previous logs were being attached to new ones. Fixed that one too.

-> If Email didn't work the ftp stopped working. A little change in try catch position here and there Fixed. Now you can use either one of them or both.

-> Added 2 Stub types. Admin and Non Admin Stub. Admin Stubs gives full power to the logger etc etc.

-> Stub size Reduced significantly from previous versions.

==If you want the keylogger to have full control of the system use this stub==

- 1) Copy Admin Stub and keep it with Keylogger v3.exe
- 2) Build Server like you usually do.

Flaw of Admin Stub

- 1) Will force admin if the victim has admin rights, else it will quit.
So unless you are sure or don't care about it use the admin stub.

Benefit of Admin Stub

- 1) It will give full power to the keylogger and the keylogger can exploit the system without any limitation.

- 2) Disable options will work properly on a system with Win7 OS and UAC on.

==Non Admin Stub for no Disable Options on Win7 with UAC==

- 1) Same usage as admin stub.

Flaw Of Non Admin Stub

- 1) Not able to exploit a system completely with UAC on.
- 2) Disable options will not work with UAC on.

3) Has trouble bypassing antivirus in some cases.

Benefit of Non Admin Stub

1) Doesn't need admin rights to execute.

2) Will still send logs even if user doesn't have Admin or even if UAC is on.

Thanks Again :D

hope that users don't blow your program this time :S

julevine - June 20, 2010, 12:35 pm

it a shame it been send to all the av vendors lol

now you must make a new one lol

Jatt12345 - June 20, 2010, 1:00 pm

Wow amazing keylogger and I love your forum.

SmokeWeedEatYogurt - June 20, 2010, 8:09 pm

its because of your antivirus. Avast or Norton.

SmokeWeedEatYogurt - June 20, 2010, 10:23 pm

Please answer my question? How come your GUI and Coder's GUI are so similar?

The 7th Sage - June 20, 2010, 10:50 pm

What? Nothing is similar. Its just blue color. He coded it in vb6 I coded in vb.net. Nothing is similar.

CATMAN - June 20, 2010, 10:53 pm

I keep getting this error: Emissionary Logger v3 has encountered a problem and needs to close...
blah blah blah

How can I fix this? Thanks.

EDIT: Happens whenever I try to "Build"...

The 7th Sage - June 23, 2010, 9:16 pm

you must be building incorrectly.

Check if the size of stub is more than 0bytes
Check if your icons directory is properly located as given.
Try without an icon changer. If it goes well then you are doing wrong with icons.
If its other error post a screenshot or let me teamview you today.

jack6 - June 24, 2010, 12:17 am

is better ti build servers on different email adress?or it dosen.t matter...

The 7th Sage - June 24, 2010, 12:46 am

Doesn't matter as long as you have one server running. Running more than one server "might" cause glitches.

jack6 - June 24, 2010, 2:20 am

good to know...i have few servers running on the same email adress and still working like a charm!!!

Glad you like it. The only problem people have is because of avast. I need to bypass it somehow.

Bro, maybe this helps. If I add assambly to it, it's FUD, so not even 1 antivirus can detect is. But the problem then is that you can't run the file. When you try to run the file then comes a .Net Framework error. Maybe this helps you, but this is the best keylogger I used yet too. Good Luck.

the last time i checked it worked. i'll cehck it again.

Are you doing this?

Making server then open in assembly editor and edit?

Yes I make the server then open assambly editor and edit the assambly, after I run it, there comes a .Net error and it doesn't run the application.

i kept a few post count because leechers just leech and on top of that make abusive posts and go away. Hence you need to make a few posts and i'll send you pass.

think of it as doing a small survey which works xD

what is the password to download it?

dude, can you give a new download link?

scooterman66 - July 9, 2010, 12:54 pm

I downloaded it, application failed...

noey - July 9, 2010, 3:58 pm

On the last version it never sent the actual keystrokes, but only sent me the programs that were opening up and what was running on their computer. For this one, will it send keystrokes?

The 7th Sage - July 9, 2010, 10:26 pm

Becasue the victim never typed in. If they do type i'm sure you'll get them.

Airex - July 9, 2010, 11:48 pm

Can i have the password on the forum?

because i can't DL the # link.

s4adow89 - July 10, 2010, 6:24 am

i want to buy it but he never come on in msn :((

hackerperson - July 10, 2010, 10:31 am

how do I get the password?

The 7th Sage - July 10, 2010, 11:44 am

I'll come online when i finish v4. :P

noey - July 12, 2010, 2:32 pm

Jerry - July 12, 2010, 2:38 pm

whats the password ?? :(

QuMz - July 12, 2010, 9:56 pm

hey i keep getting this error message.. when i try to build
please add me on msn , and we will do team viewer thanks
hashuhashu@hotmail.com

animosity - July 12, 2010, 11:40 pm

nice dude, I love the open webpage haha.
thanks :]

The 7th Sage - July 12, 2010, 11:46 pm

The yellow text is clipboard text.

noey - July 13, 2010, 12:37 am

Then how do I find what he actually types? Out of everything I have received (from multiple infected users), I have gotten no keystrokes.

Freshlyground - July 13, 2010, 3:26 am

A noob question how do I load the stub ?

Nitros - July 13, 2010, 3:38 am

You dont, you just open Builder.

versx - July 13, 2010, 5:17 pm

May I please have the password to your forums site, my name is versx on there, thanks.

twist3dblood - July 13, 2010, 7:28 pm

whats the forum password?

Ne0™ - July 14, 2010, 10:28 am

Nice share mate , Thanks!

versx - July 14, 2010, 12:05 pm

The logger is awesome, just got done testing it, works great. Thanks 7th Sage

Carried FTW - July 14, 2010, 12:31 pm

is there anyway the link could be fixed?

Sh4dovvv - July 14, 2010, 12:36 pm

Could you send me the visualforums.com password please?

Looks like a good logger.

Thanks

Jaddydood - July 17, 2010, 7:03 pm

link isn't working :(its not working can you fix

bruneau911 - July 18, 2010, 2:45 am

this baby still work ??

bb1ox1bb - July 18, 2010, 3:59 am

This file is neither allocated to a Premium Account, or a Collector's Account, and can therefore only be downloaded 10 times.

This limit is reached.

To download this file, the uploader either needs to transfer this file into his/her Collector's Account, or upload the file again. The file can later be moved to a Collector's Account. The uploader just needs to click the delete link of the file to get further information.

Sud0 - July 19, 2010, 3:31 am

Damn, not FUD anymore. Avira founds it.

Mundial - July 19, 2010, 5:31 am

Yea and you can't even download it anymore? I signed up for your forums too and it still required a password?..

Delysid - July 19, 2010, 5:34 am

Thanks dude! I am not using keyloggers anymore but i will add this to my collection!

Jeff. - July 20, 2010, 4:59 am

BUMP, because the older version is for some resun higher up in threads

The 7th Sage - July 20, 2010, 7:39 am

@Private version users, I'm trying to add unendable process in v4 so might take longer than expected to release.

ReinkeDK - July 20, 2010, 11:52 am

Dead link -.-' And password. Cmon bro. think...

ferbio - July 20, 2010, 1:02 pm

thanx for this beautiful keylogger i think this can work for me but the link is dead :/

The 7th Sage - July 20, 2010, 1:17 pm

nothing is dead just the rs link. You just want to get it without doing anything, its a big project.

Phreak™ - July 20, 2010, 1:38 pm

I dont know of to much that doesnt get detected by Avira so if Avira is the only 1 detecting it I would not worry about it

5h1t_warrior - July 22, 2010, 2:18 am

link not working can u fix it pl0x

Ridik - July 22, 2010, 4:29 am

It would be better if u remove that direct link,,it doesnt work anyway...just to remind u of it.

anjustinaga - July 22, 2010, 10:51 am

on this night download link from # say :

anjustinaga - July 23, 2010, 11:31 am

still for this nigh i can't download, why???

any body can help me ???

or PM the another link #_#

lordofthemanor - July 24, 2010, 1:38 pm

Any news on the 4th version?

f0xcode - July 25, 2010, 12:13 am

good man,thanks a lot

thanks,thanks :D

keylogger, good luck buddy! (:

manchiuuus - July 25, 2010, 12:28 am

download link is dead... Damn.. Dead because it already downloaded 10 times... Can you upload it again ?

ThE-iNFilTrATOr - July 25, 2010, 12:40 am

Yea, same problem... ?

lordofthemanor - July 25, 2010, 12:18 pm

U bunch of n00bs !!

C'mon people, can't you read what the 7h sage said?

You u want the keylogger u have u go on the official link.

susamen - July 25, 2010, 1:10 pm

In hack community you need a password to enter , someone has the password ? its not your login password, its a password for the users that doesnt spam

anjustinaga - July 26, 2010, 11:36 am

4 day i'am waiting this link but always same problem T_T

7h sage can u help us ??? please answer >,<

[--Anonymous--] - July 26, 2010, 11:06 pm

How do i get the private version?

The 7th Sage - July 26, 2010, 11:11 pm

By Paying 15\$ via paypal. But v4 will come out soon so will sell v4 now. Not v3

---k4kuzu--- - July 27, 2010, 7:43 am

ur going to sell the v4 so pls re up this version on some place where we can download :D..

Dawn of War - July 30, 2010, 12:02 pm

for the mirror it sais i need a premium account and for the direct thing i need to have 20 posts :(

lilhacker - July 30, 2010, 12:39 pm

Does it steels steam accounts?

You no more have the file? :(

Well... A Good keylogger just died i guess ?

Well.. If you find it, or have any other good keylogger and have a link, and want to be kind with someone what would like to have it,

well, please pm me the link? :S

Shame to ask.. But I need one.

limb3r - August 5, 2010, 5:00 pm

its so difficult getting a workable free keylogger. been searching all week
if not shitcash, then its that i have to have 20 posts to enter 'hacking forum'. sigh!

SkyFer - August 7, 2010, 4:57 am

Thanks atleast no sharecash ;D

big hecks - August 10, 2010, 10:29 am

Update mirror link please.

The 7th Sage - August 10, 2010, 11:07 am

new version released. Closing thread.
