I littetaly have 48 hours before a big test, I need the following as I do not have the time at the moment:

- 1) A Fair sized wordlist to crack WPA2 on NETHUNTER, at least tested and able to crack A-Z including numbers and symbols catipals lower case mix..
- 2) A bit of coding, or any tool even guide to infect a pc, smartphone, internet host , remain undetected, and have been tested...
- 3) Alternative Mali NETHUNTER tools that are interesting....
- 4). A excellent Bot that has a full gui and reviews here on HF...under 50 plz
- 5) Any guides or prebuilt & tested Devices for espionage, pentesting, exploiting, Social engineering etc....
- 6)

Anonymous?Asfar as I heard Anonymous is the governments tool. Some top level members knowingly and unknowingly take orders from some advanced intelligence part of the NSA or some bullshit that is involved with the government. In the end some anonymous members endd up doing the dirty work for the same people they're always exposing and what not....well we all get some type of run around and end up kicked on the side of the head by some genius's social engineering or mentalist mind hacks, a lot more then we'll ever realize =P
