Thread: [Using Syntax Highlighting in vb.net](#)

JoshuaSmith - July 31, 2015, 4:51 am

Hey HF Josh Here with Another .Net Source

Today i'm releasing a source for highlighting words with in your Program.

What is this used for?

well it can be used for a lot of things but its seen mostly in of IDE software. (ie, Visual Studios, Net Beans, xcode ect)

What The Tool Like Like In the source.

Set Up forms:

Main Form

Virus Scan:

[VT Detection ratio: 0 / 54](#)

Download:

Spoiler [\(Click to View\)](#)
[Here](#)

As all ways i can only ask if you use this that you gave most credit but as i know when i release a source that i can stop people from leeching. even if they do it doesn't stop me from releasing this as i won't release an encrypted program because that won't help people learn from.

just right click the image and view
there is no view
they arent even links or anything just broken
