Thread: [\[TUT\] |Seo| SENuke - Best working SEO Tool |Video|](#)

xb0y - June 20, 2010, 1:27 pm

First Important thing

Before we begin with any SEO technique, it is important that first your site is included in search engines.. Use the following sites to submit your site to search engine, the more u submit to, the better is it is because u get backlinks..

www.evrsoft.com/fastsubmit/
www.submitexpress.com/
www.addme.com/
www.freesubmissionweb.com/
www.ineedhits.com/free-tools/submit-free.aspx
www.submitshop.com/freesubmit/freesubmit.html
www.searchengineoptimising.com/free-search-engine-submission
www.addpro.com/submit30.htm
www.pageranklist.net/search_engine_add_url.php
<http://freewebsubmission.com/>
<http://addurl.amfibi.com/>
www.burf.org.uk/submit.phpsubmitforce.jerkasmarnad.com/
www.localsubmit.com/free.asp
www.srsubmit.info/

Second important thing

Download some tools to keep a track of your SEO campaign.. That is to know wheather ur SEO technique worked or I was just bluffing u.. lolz...

U can use many sites for keeping this track, u can also google's webmaster tools. I wuld recommend this site:

<http://adf.ly/3Lzb>

Completely free, just register(even that is optional)

[Check My Previous Topic On SENuke First :\)](#)

1. SENuke Tutorial: Getting SENuke Content Indexed

This is the best tutorial yet- it reveals a secret tactic to getting your content indexed. Getting your content indexed means more backlinks and more exposure accross the internet. Enjoy! Here is the text document with all of the popular Identi.ca Groups:

<http://adf.ly/3Lzh>

Important thing to remember

Since this is cracked version decaptcha will not work, disable autocaptcha solving before

proceeding

2. SENuke Submitter Tutorial

It's pretty basic, but shows you how to use it correctly to increase the amount of successful submissions.

3. How To Post In The Web 2.0 Profile Nuke

This will show you how to post efficiently in the Web 2.0 Profile Nuke of SENuke. There's many different ways to do this, but I think this should help you with some new ideas.

4. SENuke Article Writing Tutorial

The Article/Social Network a part of SENuke is probably the best. Because of the possibility, nothing's worse than bad articles. For starters, your article should get accepted. This signifies that you must abide by ALL websites' terms of conditions. The average directory requires about 200-300 words, so write at the least 250. If it's lower than 200 words, it's unlikely to get accepted by many networks. Formatting can also be very important. It's extra seemingly going to get accepted if it's in correct article format. The correct format consists of a number of paragraphs, good grammar, full punctuation and ideal spelling. Probably an important part is that you do not over promote your site. Never attempt to advertise in the body of the article. That will certainly get your article rejected and if it does not then unpopular. The writer bio is the only place to say your web site or business. Just make your writer bio cool and put no pressure. Briefly mention that your site will help them, however don't slam them. Since your submitting to many sites, remember to spin the creator bio as a lot as you can.

Now that you realize your article will get accepted, let's make it extra compelling. Most good articles are within the third person format. The finest articles provide true worth to the reader by offering helpful, distinctive content. Bad articles will simply offer you a nasty status and can do no good. Don't make your article too complicated or too simple. Your article needs to be focused in direction of the information, means and a spotlight span of your market. Be certain that your article is spun to at the least 35%. The search engines like google will decrease your rankings if it's not. Have enjoyable and go wright some good articles.

5. RSS Mixer & Combiner In SENuke Tutorial

This tactic is extremely powerful for awesome backlinks. Do this method with the rss from your

social book marking sites and web 2.0 sites which can all be found in the URL manage

6. Project Management In SENuke

This will show you how to save SENuke projects on the global save feature and on the simple save buttons on individual modules.

7. How To Fully Maximize The Article Directory Nuke

Just by watching this video you probably already realize how important article marketing is and the incredible rankings it can get you. In SENuke, it's extremely easy to create unique articles with unique links and then submit them to the major article directories for good exposure, popularity and rankings

8. How To Choose Good Keywords With SeNuke

hopefully this should help you find some decent keywords that you can rank for on Google. Remember, if you're first starting out with SeNuke, then begin with easier, less searched keywords. Do this by googling, "Google Keyword Research Tool." Also, this video shows you how to find out how "dominate-able" a niche is. I hope you enjoy and remember, if you don't rank at first try, keep trying! If you are still having problems either with using SENuke or ranking for your keyword, check out this ;)

9. Using SENuke to Auto Sign Up for Web 2-0 Accounts

THIS IS THE FIRST MODULE TO BE RUN

Except for the keyword research all modules require this to be run first...

Thats all..?

Hope thats enough for you all..

In case of problems ask here... And do say thanks if u like this...?

iRofl - June 20, 2010, 1:31 pm

Very detailed guide!@ Thanks I needed this.

Sincerely,

iRofl.

Yultoma - June 20, 2010, 1:32 pm

Where is the download link for the cracked version???

Or you can simply buy it from H3llb0y... (he cracked the latest version)

Thanks for the share!!!

Thanks for the share!!!

Mate i already posted a cracked version on my previous topic on SeNuke but i forgot to post link here :D

Now check link updated ;)

Far - June 20, 2010, 2:40 pm

SEO tool, just what I'll need in a few days. Very detailed, nice tutorial!

dreadnought2020 - June 20, 2010, 4:24 pm

Massive thanks!!! I'm about 20 minutes into following the first tutorial. Absolutely ecstatic about being shown exactly what to do.

I've only got SENuke 5.something but i'm sure it'll do!

Cheers

xb0y - June 21, 2010, 1:30 am

Thanks Far & dreadnought2020 :)

i'll post more Seo techniques soon :)

Tunnel Vision - June 21, 2010, 4:26 am

Thanks, i needed this!

Too short
