Spoiler ([Click to View](#)) I am hiding in plain sight, look where I am obviously placed, and you will see me plain as day.

My Encryption is best used through True Crypt

My Cypher is simple, once you know what you are looking for

\\Edit

Geass - August 1, 2015, 2:36 pm

when you say "decryption string" its a text on the video or i need and to hear it?

When I state "decryption string" there is a decryption string that must be solved, simply.

Spoiler ([Click to View](#)) It is openly given to the user. Thus my hint "I hide in plain sight" ?

i like the "simply" part ?

only simple it isn't :P

very difficult, will try check the video again.

?Fetz? - August 1, 2015, 5:41 pm

Think I may of figured some part of the puzzle out. Working on testing my theory.

Geass - August 2, 2015, 2:42 am

No hope, i can't find anything on video after 5th time watching it.

edit:

if its possible can you tell if the decryption string is one word or a phrase?

Its possible, but I wont, that is part of the challenge.

There is a top prize of a \$200 Award up for grabs here, you did not think I would make this TOO easy did you? ?

Protip: Sometimes its not what you are looking for but where.

Busy with the key at the moment, will have it soon I guess.

MrOrang - August 2, 2015, 6:46 am

Trying to figure this out. Gotta think outside the box for this one.

FeatureBug - August 2, 2015, 7:26 am

Gonna take a crack at this. Made a little progress and I have a few ideas.

I hope to have good news soon! Wish me luck!

Geass - August 2, 2015, 12:17 pm

I just hope not to be close to the answer if i failed when the contest over, even if its easy or not.

I even watched Pirates of caribbean to check for the part with "the rum is gone" and watched the start where Turner hide something he break on the basket.

results 0 :(

That is an awesome movie, but honestly, has little to nothing to do with this challenge. We are decrypting a file in this, nothing more. ?

Tick to the Tock.

Less than 8 hours remain. ?

I'll have to throw in the towel, I can't get it.

Cheers for giving me something to do these past 10 hours even tho' I couldn't figure it out. -_-

Only things that stick out to me is the Explosion (nuke or w.e) and that the only text that is in the entire video is "Why is the Rum Gone?" but I've already gotten rid of TrueCrypt now.

cba to get it back.

I got it maybe. Op has a meme video. Then posts an "encrypted" file while he's trying to meme us.

So the message is: memes

Nope. The some.file is encrypted using TrueCrypt. The decryption string can be found if you think "outside the box". The video is just a diversion.

Read between the lines. Why did you think he told us that you would hate the solution? Maybe because others watched the video over and over and over again but the answer is not there? Look for you. Take his hint: it is hidden in plain sight.

Anyway, here's the encrypted key:
