Thread: [Rate My Minecraft Forum Avatars](#)

Assossa - August 1, 2015, 10:19 am

Hey guys, I've been making minecraft forum avatars for fun. I'd like to see what you guys think!

This was the first one I did on myself, low resolution:

puu.sh/jlwH8/d038166dbf.png

Another one, higher res now, removed the glitch effect from the player:

puu.sh/jlwLK/602a1796e0.png

And the last one, I removed the paint splash effect from the back and added some rgb shift to the player:

puu.sh/jlwSk/dfe49ce2bb.png

And finally what do you guys think of my HF avatar?

All suggestions and constructive criticism are appreciated.

Thanks for taking your time to look at my thread!

(Sorry for not posting clickable links or images, I'm not up to the post count yet)

Hi friend! I don't like minecraft but i Think the first Avatar is the better, and respect your actually Avatar i say; You should try other effects, or without effects, good luck! :D

Edit:

Your images here;

I don't really like the glitch type effect you created, try to look some of watchdogs marketing images and take some ideas from them :)
