Thread: [CS:GO Jackpot Script w/ Bot and DB](#)

NyDaHood - August 2, 2015, 3:45 am

I've had enough of dealing with people selling public source for ridiculous prices.

PM me and I will give you a zip with every single source code that I found.

After 1 hour I got everything I needed to start running a jackpot website. Be aware that this public scripts are known for having a lot of bugs. You might have to put a few hours into the code.

I have files for the bot, database and front-end. I have also the design of various websites. I can also tell you where I got this all from but you can just find it in the middle of the files.

I'm not giving this to not upgrade users because normal users represent 90% of the people trying to sell this and I'm pissed off about it.

Thanks OP!

Sent, my friend.

By the way, in the node js bot, there's a huge bug: If there are repeated items in the pot, the winnings trade offer gets bugged because one of the repeated item shows twice in the trade offer, if you understand what I mean.

pebsi - August 4, 2015, 6:29 pm

Sent you a PM. Would love to take a look at this.
