Thread: [Easiest way to eWhore \[KIK only\]](#)

Oddissee - August 3, 2015, 9:25 am

Requirements: [Bluestacks](#) or Mobile Phone

Patience

Simple knowledge of getting traffic (Will be discussed)

First of all the first thing you want to do is download Bluestacks, [Click here](#).
It's a very long download/installation.

After open up bluestacks and it'll say you need a Playstore account go ahead and make one with a fake email account if wanted.

Then download the OLD kik:

<http://www.mediafire.com/download/mkylvf2a3g2h1l3/kik.android-7.3.1.111.apk>

And live camera:

<http://www.mediafire.com/download/mz1pri8y66od73m/cz.shmoula.android.fakecamera.apk>

After downloading when bluestacks is installed just open these files and they'll install.

Now open KIK then just click the camera button when wanting to send a pic and click "File Explorer" then look for the picture on your PC you want to send as a "Live/Camera" pic!

Setting up Kik:

- Think of a female name that you can use and personally for me make sure she's above 18 it's more effective unless you want to target pedophiles.
- Find an eWhore pack [HERE](#), it's more effective if you purchase an eWhore pack as it's less saturated meaning you'll have more chances of landing some \$\$.
- Set your profile picture as a half nude eWhore. This way the people who you are targeting knows that you are dirty or whatever.

How to get traffic:

- Register/Post on ALL these websites and it's guaranteed traffic:

KikFriends.com

KikFriendFinder.Co.Uk

KikFriender.com

Kiksnapme.com

^^ All these sites will give you traffic easily. ^^

- Another reasonable source is Omegle.

Tips/Tactics:

- Avoid anybody younger than 21 they will not pay, saves alot of time.
- If they keep saying oh give me a minute and they keep delaying payment, just block them or try to persuade them, if not then block them.
- If they are asking for a preview just send one, if they ask for another just say no, and if they beg

just say you're selling them or whatever niche you're using. If not just block them.

I personally just sell nudes and say I'm saving for a new laptop. The more people you get through the more \$ you're gonna make, don't waste your time on people who won't pay.

Double Dipping (2x \$):

Double dipping basically means you're getting double the money from one person. It's really effective if you can persuade the payer. Basically this is how it goes...

eWhore: I didn't get anything can you resend it?

Guy: Are you sure? I sent it

eWhore: Really babe i didn't get anything :c

eWhore: hurry babe i'm really wet.

Guy: (Gives in) okay ill try it again..

Easy money ^^^

Another method for Double Dipping:

Make 2 different emails but very similar--->

Code bigbreastsarahh@gmail.com

bigbreastsarah@gmail.com Tell the user to send the money to the first email, then trick them and say oops that was a typo 80% will send it, if they don't send it just say okay i feel bad so just sent half!

CSGOLoverMate - February 13, 2016, 3:56 pm

Lol this doesn't work, just look at the girls on the site there are hundreds that are doing the same thing. And most people will ask for verification and such and not fall for it. Why would someone buy nudes of a random girl when they can just do it for free? And even when you do make money, you're making the equivalent of minimum wage or less in any first world country. I have my own methods that I have started working on just because I wanted the challenge of actually tricking people and the minute I actually get a real job I'm quitting this, it is essentially tranny prostitution for minimum wage.

Simple knowledge of getting traffic (Will be discussed)

First of all the first thing you want to do is download Bluestacks, [Click here](#).

It's a very long download/installation.

After open up bluestacks and it'll say you need a Playstore account go ahead and make one with a fake email account if wanted.

Then download the OLD kik:

<http://www.mediafire.com/download/mkylvf2a3g2h1l3/kik.android-7.3.1.111.apk>

And live camera:

<http://www.mediafire.com/download/mz1pri8y66od73m/cz.shmoula.android.fakecamera.apk>

After downloading when bluestacks is installed just open these files and they'll install.

Now open KIK then just click the camera button when wanting to send a pic and click "File Explorer" then look for the picture on your PC you want to send as a "Live/Camera" pic!

Setting up Kik:

- Think of a female name that you can use and personally for me make sure she's above 18 it's more effective unless you want to target pedophiles.
- Find an eWhore pack [HERE](#), it's more effective if you purchase an eWhore pack as it's less saturated meaning you'll have more chances of landing some \$\$.
- Set your profile picture as a half nude eWhore. This way the people who you are targeting knows that you are dirty or whatever.

How to get traffic:

- Register/Post on ALL these websites and it's guaranteed traffic:

KikFriends.com

KikFriendFinder.Co.Uk

KikFriender.com

Kiksnapme.com

^^^ All these sites will give you traffic easily. ^^^

- Another reasonable source is Omegle.

Tips/Tactics:

- Avoid anybody younger than 21 they will not pay, saves alot of time.
- If they keep saying oh give me a minute and they keep delaying payment, just block them or try to persuade them, if not then block them.
- If they are asking for a preview just send one, if they ask for another just say no, and if they beg just say you're selling them or whatever niche you're using. If not just block them.

I personally just sell nudes and say I'm saving for a new laptop. The more people you get through the more \$ you're gonna make, don't waste your time on people who wont pay.

Double Dipping (2x \$):

Double dipping basically means you're getting double the money from one person. It's really effective if you can persuade the payer. Basically this is how it goes...

eWhore: I didn't get anything can you resend it?

Guy: Are you sure? I sent it
