Thread: [Mass Messenger](#)

What it is:

Basically this is a quick and simple tool I made in 5 minuets.

All it does it sends a message to all users you have added as a contact.

Why I made it:

One of the reasons I made this is because when I'm on Skype I got around 400 contacts and I always get people messaging me with bla bla bla and at the bottom is has sent by "Names Skype Tool. I've made this one so it has no "branding" or whatever it's called at the bottom. So you can send messages easily.

How to use:

1. Download the program.
2. Make sure Skype is running.
3. Open the program.
4. Go on Skype at the top it should create a box like this:
5. Simply click "Allow access".
6. That's it! You are ready to send your messages to all your contacts!

If you need help feel free to PM me.

If you want the source PM me.
