Thread: [SnakeSquad | Greyhat Hacking Group | Recruitment](#)

CryptedPacket - August 4, 2015, 12:40 pm

??

Hello everyone and welcome to SnakeSquad! A greyhat hacker group. We have now opened our recruitment and are inviting you all to apply! SnakeSquad does pretty much what they want. Sometimes we'll do some penetration testing. Sometimes we exploit an SQLi vulnerability and later on, crack a password hash for the website's login system. We share our tools and knowledge and share all of our income!

??

What types of attacks we perform:

Spoiler ([Click to View](#))

SQLi, XSS, Doxing (Not Really An Attack), OpenRedirect, E-Whoring, Social Engineering

Other stuff that we do:

Encryption, Ciphers, Programming, Hash Cracking etc.

??

? ??? ?

We search for people with a decent hacking experience that have tried hacking before. Unfortunately we will not accept people with a low experience because of complications we've been having earlier.

Requirements (How The Apply Should Look Like):

Spoiler ([Click to View](#))***** Skype: *** Country: *** Age: *** Reason why you want to join: *** Knowledge:

Please check out out (new) twitter account where we post all the attacks we are currently performing. [twitter.com/snakesquadofc](#)

Unfortunately I have not posted enough to makes this thread look good. Sorry for bad design. Thank you for reading our post and I will hope to see you soon!

Oh my god. This is some scary shit. Good luck dude.

WhiteCow - August 4, 2015, 1:08 pm

*** Skype: I use a VPN but still PM me for this *** Country: Croatia *** Age: 19 *** Reason why you want to join and knowledge (answering both):

I'm a really experienced hacker in the greyhat area. I earned 10,000\$ in DOXing one month. REALLY experienced DOXer and programmer. I'm new on HF and would like to join in on this little project.

Dickface - August 4, 2015, 1:09 pm

I will join if it's renamed from SnakeSquad to SquidSquad

Why do all these hacking groups have squad seriously so cringeworthy xD

r3tsquad - August 4, 2015, 1:16 pm

Why are you applying?

I was promised a Greyhat.

List 2 contributions to HF you have made.TEXT

What should SnakeSquad expect from you?

A very stylish, motivated and hard working member that likes to hack

Why should we pick you over the other applicants?

Because I'm very like able and will make people laugh

Anything else?

No I pretty much covered it

i only got 2 things to say about his thread

1. whitecow, you must be the strangest member ever... you got more neg rep than posts, you got MINUS in prestige.. and.. yeah that's all.. "uuhumskidhmmhm)
2. CryptedPacket, either, your name isn't snakesquad, you just don't want to tell your real name, cause you are really good and blah blah blah or you are just a retard that is probably 12 years old, your bigger brother has shown you a little about kali linux, so you think you know everything about "pentesting" and you probably using havji for sqli...

okay guys, i know, kind of rude, but comeone, someone had to say this ?

I don't, I just want to highlight the differences between what you advertise, and what I would have assumed any hacking group would at least have a grasp of.
*** Abilities; I've tried to be as fairly comprehensive as possible where my abilities are concerned, There are obviously areas within areas that aren't mentioned, I could've been much broader, but this will suffice:
Buffer Overflows (of course, kek), Format Strings, Remote UDP Fuzzing, Remote TCP Fuzzing, Malware Analysis, Remote Packet Fuzzing, Bluetooth and Wireless Fuzzing, Browser hooking attacks, AttackScripting, Remote Code Execution, Logic Bombing, Server Side Javascript injection, IP Spoofing attacks, Programming: Python, C#, HTML, Javascript, C++, ASM, PHP, ASP, Man In the Middle Attacks, DNS Spoofing, ARP Spoofing, DHCP Spoofing, VLAN Hopping, Wireless Hopping , Direct Stealth Port Scanning, InDirect Stealth Port Scanning, Wireless Attacks, Malware Creation, Operation, Infection, Web Injection via Mitm, Exploit research, Shell injection, Denial of Service, Server Sider Includes, Source Spoofing attacks, Fuzzing (Automated), Sqli (Manual), XSS (Manual), RFI (Manual), LFI (Manual), PHP Object Injection (Manual)

I wonder if this enumerates the differences I am battling not to perceive, between your "hacking" group, and my own work.
