Thread: [RSPS Bug Testing Service](#)

The Plague Doctor - August 5, 2015, 5:19 am

Myself and my team have decided to create a service in which we will bug test your whole RSPS or specific content within the server.

We will look for bugs such as -

Dupes

Staking bugs

Graphical bugs

Smuggling bugs

& more (feel free to ask what else we will check for).

*Of course, this can vary if it's for specific content.

Prices / payments -

Prices will vary on the content / what bugs we find, so they'll be negotiated accordingly. All payments will be in RSGP or BTC.

If you are interested in this service, feel free to pm me or post below & I'll get back to you.

About my team / past work -

My team consists of 6 members: Myself, Alta, Steven, Brandon, Quint (ex-haxunit) & Fluid Karma (ex-haxunit).

We are definitely the most suitable for the job and you won't find better, below will be some of our work, mostly on real RS, however we have duped on servers such as:

Ikov (multiple dupes, 5+ cfts etc)

Soulsplit (multiple dupes, 5+ staking bugs, rank 2 extreme exploit, etc.)

BattleScape (multiple dupes etc)

OSRSPS (Duped)

RS2006 (Duped, noclips etc)

Near-Reality (multiple dupes etc)

Roat-Pkz (staking bugs)

Pk-honor (staking bugs)

Alotic (Duped)

ProjectRS06 (multiple huge bugs)

FirePK (Duped)

*This list will be updated as I remember more.

Previous work pictures / videos -

*Feel free to request more previous work examples, this is just a portion of our work.

Vouches from this service -

(Aug 6, 2015 03:30 PM)Tizen Wrote: [\[CITE\]](#) Huge vouch for this service and for Plague Doctor. I

paid him and his team to bug test some specific content, and they did an excellent job. We patched 99% of the bugs immediately; and I'm not talking about casual bugs, I'm talking about bugs that could of posed a major threat to the game mechanics and the economy. They also re-tested bugs after they were patched. Him and his team are very professional and they work together to ensure the maximum potential of bugs found.

Will definitely use his services again in the future!

I have been lucky enough to have worked with Plague before. He is extremely skilled in this scene

and so are the rest of his team.

If you need bugs fixed don't look any further than this thread. A very big vouch from me!

Are you willing to find bugs for servers we don't own? As in, we give you a server, you find a specific bug or something and we pay you for it? Thanks.

This isn't relevant to this thread, and any bugs like that would never ever be for sale, lol.

Question, Will you guys bug test OTHER servers, and report back with dupes and how to do them? or is this strickly to secure a owners server.

Strictly for owners only, otherwise I'd just sell the duped gp.

SeraphsEmbrace - March 16, 2016, 3:15 am

Vouch for TPD, one of the best at what he does.
