Thread: [Hacking on a web browser based game](#)

LeMelsAwesome - August 5, 2015, 9:35 am

Hi,

So i was wondering how can i "hack" into a web browser based game, and i don't mean like Flash game or anything like that but games like this one:

vdtruck.-net or howrse.-com (remove the "-"...i can't post links)

I wanna know if its possible to do it and if yes, then how can i do it?

I wanna know if i can change stuff like password, in-game stuff like money and so on.

'To start playing, choose your first horse or pony!'

OP, you a brony?

OT: Cheat Engine? If it's server based then you're fucked mate.

Well it is server based...i can't do anything?

And i'm not a brony XD

I do like mlp but i'm a girl so i call myself a pegasister XP

use Burp Suite and test it there, maybe it will work

i see the site is from around 2017, you could try testing it for vulnerabilities
