PicoNeko - August 5, 2015, 1:28 pm

Nice! Works fine on my 10" tablet, also the upload button icon is missing :/

Toph Beifong - August 5, 2015, 1:50 pm

What tablet/browser were you using?

And thanks for the feedback, im currently working with html conditionals to get IE8 support but their being a bitch

Windows 8 tablet with chrome, and good luck getting stuff to work on IE ?

It doesn't compress images right? I may use this as my main image host if it doesn't like Imgur does. Also, what's the max file size? If you can, you should add a drag 'n' drop c:

Toph Beifong - August 7, 2015, 1:09 am

No, there is no image compression. As for file size i've currently got the max at 10MB... Ye i have some time off work over the next few days so i'm going to look into drag drop upload then.

Husqvarna - August 7, 2015, 3:40 am

TBH, the uploading time is slow. Took 10 seconds to upload normal image with 100mb/s internet.

Toph Beifong - August 21, 2015, 6:54 am

Been doing a little tinkering with a few bits, such as adding image settings etc. The update should be getting released soon.

Toph Beifong - August 27, 2015, 2:00 am

Working on making the site mobile friendly, follow it on Twitter, Facebook or Google+ to keep up with whats happening...

StevesTrolls - August 27, 2015, 4:36 am

Looks really nice, good luck OP - if you need a hand with any web design, feel free to lmk :)

Tbh i'm looking to turn it into a community project with profits from the site being used to maintain it and then back into other well deserved projects.

I know its a long way to go but you're more than welcome to get involved. Send me a PM if your interested.

P.S, our official Facebook page is starting to game momentum. 58 likes this week alone.

Huge update on the way: Responsive new design - <http://gexii.com/beta/index.php>

Optimized - October 3, 2015, 2:48 am

Sorry the home page looks more like a private company than image sharing

Personally I would change the home page make it more obvious what it is. Apart from that its good.

Probably my favorite image hosting site so far.

If you can, you should add;

- Drag and Drop upload
- URL upload
- Shorter URL's
- A "Click to Copy" URL button for the images
- A way to have all the links copied at once for images like when you upload more them so you don't have to copy and paste each one separately.

Thanks, and thanks for the suggestions. Im currently working on a home page upload button(Proving more difficult than i sounds). As for Drag/Drop upload im looking into how it works.

Copy all the links wont really work as it would copy them all and make it seem like one large piece

of text.

I'll think about the rest and see what i can come up with.

Very clean for your beginning work. Keep it up. I will continue to use to support your service.

Awesome, thats what we like to hear. We have a Chrome Extension & windows application on the way. Will keep you all informed. Shouldn't be too long.

Toph Beifong - October 13, 2015, 5:24 am

Updated the user accounts, you now have full control over the information you have on the site. E.g. Email, Name etc.

skorpx_99 - October 13, 2015, 10:14 am

Looking pretty good. Quick suggestion for your /upload.php page. Add a Copy button that when pressed will copy the image link into clipboard. Also, you may want to display the image that the user just uploaded here as well.

Coping to clipboard is quite difficult in alot of browsers due to security. As for the image i may look into adding something along those lines. Thanks for the feedback.

Also, i've made a nice little update to the home page by giving it a upload button. Making it far easier and faster to upload your images :)

Huh... seems i forgot to re-upload the edited initialization file. Should be sorted now. Thanks. What you think of the overall design?

Hope you all like the changes which im making, follow us on Facebook. We've been making some good leaps forward with our google ranking aswell. We should be working on some members areas soon. Hope you'll like what we have coming...

movizdb - October 31, 2015, 11:13 am

Looking good, you should advertise more and also provide API so that other Webmasters can integrate your uploading services into their website

Toph Beifong - *October 31, 2015, 12:00 pm*

Hadn't even thought about doing an API. Thanks for the suggestion, I'll look into it.

Toph Beifong - *November 5, 2015, 8:18 am*

Traffic and uploads have been improving recently. Thanks for all the support and keep uploading :)

Oh crap... not even sure how i missed that. Thanks.

Hope i see your GFX work being stored on the site XD

No worries mate, its a pleasure

I will definitely give it a try :3

Toph Beifong - *November 8, 2015, 7:54 am*

Awesome, thats what i like to hear XD

Also, a small improvement to the members area of Gexii. I've added hover bubbles when looking at images within an album. I've also been adding a pretty new "image delete" button. Hope you all like what we're doing with Gexii.

FRANKIE - *November 8, 2015, 7:57 am*

Neat site op. I might switch over

Nozemi™ - *November 8, 2015, 9:10 am*

Nice work on that image uploading site! Haven't tried it out yet, but I will, and when I've done, I'll come back with what I think of it's functionality.

EDIT:

So I've tested the functionality. It works well. The thing I miss is drag and drop onto the site. Other than that, nice work!

Made a few small tweaks behind the scene. Also made some updates to the members areas.
Enjoy!

Toph Beifong - December 10, 2015, 1:29 am

Taking suggestions, what would you like to see next? API, Drag Drop upload...

Let us know, we'll get right on it. Also i'd like to say thanks for all the facebook support, we're up to 120 likes on the page. I know its not much but it means alot.

pmfajohn - December 13, 2015, 12:25 am

Really nice site... Bookmarked :-D

Jaex - December 13, 2015, 12:57 am

I was going to give ShareX custom uploader code for Gexii so people who using ShareX can upload to Gexii but because that code was including link of Gexii, I couldn't post it: "Sorry, you cannot post links, videos, or images until you've made more than 50 total posts or have upgraded." :(

Edit:

```
Code {
  "Name": "gexii.com",
  "RequestType": "POST",
  "RequestURL": "{GEXII_URL_HERE}/upload.php",
  "FileFormName": "files[]",
  "Arguments": {},
  "Headers": {},
  "ResponseType": "Text",
  "RegexList": [
    "Image 1:.+?value='(.+)'"
  ],
  "URL": "$regex:1,1$",
  "ThumbnailURL": "",
  "DeletionURL": ""
}
```

Replace {GEXII_URL_HERE} with Gexii url.

Looks great, will definitely be using this!

Thanks for contributing, im looking to add an official API so people will be able to make applications. Hoping to get on it over the next couple of weeks.

Added custom uploader json of your site here:

By the way you wrote "Save As "gexii.json"." in your web site but people not need to save it. You can just copy json text and then press "Import from clipboard" button in ShareX.

Toph Beifong - January 19, 2016, 11:41 am

Completely redone the design. Much cleaner dark look to Gexii now... Hope you all like the changes :)

Toph Beifong - January 25, 2016, 5:09 am

Just going to bump this up. Would also love to hear some feedback on the new design...

Robbedoes - January 25, 2016, 7:31 am

The "Select Images" button doesn't change my cursor to pointer when I hover over it which really bothers me. It looks really nice though so good job on that part :')

EDIT: I kind of expected the social media buttons to go completely pink when hovered over, might be a nice thing to check out.

abdel - January 25, 2016, 9:35 am

Looks much better than before altho everything seems to be crammed into the center would look better spaced out.

Added the pointer CSS for you ;p as for the social buttons im gonna look into that...

As for everything being "crammed" thats just the design i've gone for. Personally i dont think it is and each to there own im afraid.
