Thread: [Hack Pack - 0.5GB](#)

CrazyPolokHacker - August 6, 2015, 12:11 am

Here is a pack with all sorts of hacking tools, including rats (I know Hackforums loves rats), keyloggers, Web tools, password tools, and cryptography tools. I threw this pack together for a friend who lost his tools, (Also newcomers who want to get started are more than welcome to download) so i made one with tools that seem to be useful.

However, I haven't used every program in it, except for a few. For the duration of the time that i had these tools, they've always been inside a virtual machine, and i haven't noticed any suspicious processes lingering around after opening. (I used rKill and ESET NOD AV)

Here is the DL:

Wow nice pack you got there thanks :D

Bius.Gh0st - August 6, 2015, 11:00 am

please reload it ..

its offline :(

Just checked, Its up. Don't worry, I'll keep it alive.

DivideByZero_lux - August 6, 2015, 2:45 pm

It is down again??? :) (25....)

Strayta - August 6, 2015, 2:46 pm

Please upload a virus total scan man

Ursino - August 7, 2015, 5:11 am

You didn't put a virus scan of the file and MediaFire blocked it: Dangerous File Blocked

It looks bad :|

Your file is down again as other say...(MediaFire does not enable distribution of dangerous files.)

CrazyPolokHacker - August 9, 2015, 6:51 pm

Sorry Guys about the link, here is the new thread:
