Thread: [Award image: Show the award reason on mouse hover](#)

Cammy - August 10, 2015, 5:38 am

(Aug 10, 2015 04:27 PM)Hash G. Wrote: [\[CITE\]](#) It's a good suggestion, I like it. What DB said is right as well. Having something like "Award: reason" can be good as well, like "Gift: A gift from xxx". Basically this, like mentioned here rather than making it Gift specific display the award reason as well instead of just the award name for every award that exists.

Original post [\(Click to View\)](#)

So right now when you hover the mouse over the gift award image it just displays 'Gift'.

My suggestion is to add the name of the user who purchased (gifted) the award to the other person the same way it is shown in the awards list in the member profile.

Before:

After:

It's not a big problem or anything but if you want to find out who gifted the award this would be a faster way instead of going to the member's profile and view their award list.

The Illusionist - August 10, 2015, 5:40 am

I think this would be a nice update, makes it a bit faster to see who gifted the award instead of going to the profile and then to award to check it there.

iSmile - August 10, 2015, 5:40 am

Good suggestion :)

+1 from me.

Raymond Reddington - August 10, 2015, 5:41 am

And what about the users who have bought themselves a gift? Would it show " A Gift For & From Himself" ?

Terry A. Davis - August 10, 2015, 5:42 am

Next we'll want Ub3r from * when someone gifts Ub3r.

Cammy - August 10, 2015, 5:43 am

(Aug 10, 2015 05:41 AM)Raymond Reddington Wrote: [\[CITE\]](#) And what about the users who have bought themselves a gift? Would it show " A Gift For & From Himself" ?

I think displaying the username would be a better idea to avoid confusion (in my opinion)

Supporting this idea. Would look cool. ?

Doctor Blue - August 10, 2015, 5:50 am

Without having any particular opinion on the idea, you would essentially put the award reason in the hover text.

Instead of the award name, makes it an expectation Omni needs to add and I don't see him doing something small like this.

Meow - August 10, 2015, 11:25 am

Doubt this will get accepted but I really like the suggestion!

Leeway - August 10, 2015, 11:26 am

This is a good idea man nice thinking :)

Doctor Blue - August 10, 2015, 11:28 am

It seems to me, that like I do, he prefers to make small changes and fixes here and there. He does a lot of small things between the big projects. In both cases I imagine it being a trivial change as the awards are already fetched per user. The query just has to be changed to get the reason as well.

With that being said, I think it's a rather pointless feature.

Zeeka - August 10, 2015, 11:34 am

It says who gifted the user here: <https://hackforums.net/myawards.php?awid=71>

Mr. Money™ - August 10, 2015, 11:35 am

Seems like a good idea :) Nice to see you used me in the example pics :)

Nasyr - August 10, 2015, 11:37 am

I agree you'd be as well just making it display the award description (given when being granter) than the award name.

Regulus - August 10, 2015, 11:37 am

Seems like a nice suggestion actually. But you can just go to their profile and view their awards there and it'll show up, but I support this idea to make it easier and faster to see :)

Aurora - August 10, 2015, 2:43 pm

Let me ask you this. When is there a time you want to see the gift sender on someone's profile? I'm not sure if people have the urge to find who the sender of each person's gift award is. I mean you'll probably want to know once in a while for some people, so why not view their profile? It's not hard to click one or three more times to see the sender.

It's not hard to click one or three more times to see the sender.

I find myself checking it once in a while, and for sake of simplicity I thought I'd suggest this.

Regan - August 10, 2015, 3:02 pm

Really like this idea and support it good on ya Jawe.

Hash G. - August 10, 2015, 4:27 pm

It's a good suggestion, I like it. What DB said is right as well. Having something like "Award: reason" can be good as well, like "Gift: A gift from xxx".

Lipton's Ice Tea™ - August 10, 2015, 9:32 pm

Honestly makes sense. Vouch. Hope this gets accepted tbh would be a nice touch to the award system

Brendan - August 10, 2015, 9:43 pm

I don't really see the need for this.

I can't think of a time I wanted to know who sent someone a gift, so I went all the way through their profile in order to find out.

Trifecta - August 11, 2015, 7:45 pm

The idea is original, hope to see it possibly be implemented in the future.

NoSuchAgency - August 11, 2015, 8:09 pm

This is the better option I think. rather than making it gift specific.

Mike? - August 12, 2015, 12:13 am

I really like this idea as well. I hope it's gets implemented.

Mr.Peanut - August 14, 2015, 7:46 am

I support this idea. It'd be pretty neat if the user who bought this was shown when hovered. That's more simple but yeah..

Cammy - August 19, 2015, 6:51 am

Still interested in Omniscient's thoughts on this.

Edited thread title.

Supreme??????? - August 19, 2015, 6:52 am

I like this idea. However, I don't think Omni will do something this small. We'll see though.

Omniscient - August 19, 2015, 12:05 pm

Hmm.....

It was a little trickier than I thought. But it's done.

630 - August 19, 2015, 2:48 pm

Needed? Probably not, but it is pretty cool feature.

Hash G. - August 19, 2015, 2:48 pm

I'll just quote me if you can find a bit more of time to do this :

(Aug 10, 2015 04:27 PM)Hash G. Wrote: [\[CITE\]](#) It's a good suggestion, I like it. What DB said is right as well. Having something like "Award: reason" can be good as well, like "Gift: A gift from xxx".
Anyway, it's really better like this, thanks!

Aurora - August 19, 2015, 5:58 pm

OP, I believe this suggestion can be closed now since Omni has implemented it.

Cammy - August 19, 2015, 6:57 pm

Nice! Thanks Omni, you're the man.
