Professor Pantsu - August 10, 2015, 12:23 pm

The old one is at like 31 pages, so I think it's time for a new one.

If your desktop isn't anime related then fuck off back to the lounge.

And you, unless you have a better rainmeter theme involving SAO then shush!

It's funny because you would have to be computer illiterate not to have a actual crack for windows 7 when there is many. Yet you're trying to come off as some "epic hacker" with the rainmeter skins, programs and the tabs you have opened. Maybe i'm just taking the bait here however it is hilarious.

I'm not trying to be some "epic hacker" I just like the skins. Whatever windows that are open are open for a reason. I'm not "computer illiterate" but why waste time getting a crack if this works just fine?

Sorry I meant it seems like you're trying to come off as one. It just gave me a laugh. Don't look into it to much.
