Thread: [\[Tool\]HashKiller Helper \(auto crack md5,sha1,mysql,etc\)](#)

RieqyNS13 - August 11, 2015, 7:19 am

this is screenshoot from the tool :

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

usage:

in "Input Hash" textbox, fill with passwords hash which you want to crack. your passwords hash pattern should be like this one :

PHP Code

```
<?php
```

user:password

password:user

password

then you must choose one radio button in "Format Hash". customize to your hash pattern.

the ':' character above is delimiter that you can set it yourself in "Delimiter" textbox. after you fill with the hashes and choose radio button, klik "Scan" button. and then the results will displayed in "Result" textbox.

so,,if you fill with this pattern

PHP Code

```
<?php
```

admin:ca539267b46266465659c5e1680a31c8

admin1:33858b53df2ff6624dd3709c06f5cc73

and you choose "user:pass" radio button, then when you klik Scan, the result is:

PHP Code

```
<?php
```

admin:deadman727

admin1:mushibwe7617

if you fill with with:

PHP Code

```
<?php
```

ca539267b46266465659c5e1680a31c8

33858b53df2ff6624dd3709c06f5cc73

and choose "password" radio button, then the result is:

PHP Code

```
<?php
```

ca539267b46266465659c5e1680a31c8:deadman727

33858b53df2ff6624dd3709c06f5cc73:mushibwe7617

password supports all type of hash in hashkiller.co.uk databases

Thanks. Good progarm. Working .

RieqyNS13 - September 10, 2015, 9:14 am

Updated

Revision 1.2 (10-09-2015)

I added bypass captcha using deathbycaptcha API, so you must have deathbycaptcha account which has balances.

this is screenshot of the tool that Enable DeathByCaptcha feature.

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

and this is screenshot of the tool that Disable DeathByCaptcha feature

Spoiler [\(Click to View\)](#)

so if you disable DeathByCaptcha feature, you must fill the captcha manually each 64 of the lists

Usage:

in "Input Hash" textbox, fill with passwords hash which you want to crack. your passwords hash pattern should be like this one :

PHP Code

<?php

user:password

password:user

password

then you must choose one radio button in "Format Hash". customize to your hash pattern.

the ':' character above is delimiter that you can set it yourself in "Delimiter" textbox. after you fill with the hashes and choose radio button, klik "Scan" button. and then the results will displayed in "Result" textbox.

so,,if you fill with this pattern

PHP Code

<?php

admin:ca539267b46266465659c5e1680a31c8

admin1:33858b53df2ff6624dd3709c06f5cc73

and you choose "user : pass" radio button, then when you klik Scan, the result is:

PHP Code

<?php

admin:deadman727

admin1:mushibwe7617

if you fill with with:

PHP Code

<?php

ca539267b46266465659c5e1680a31c8

33858b53df2ff6624dd3709c06f5cc73

and choose "password" radio button, then the result is:

PHP Code

```
<?php
```

```
ca539267b46266465659c5e1680a31c8:deadman727
```

```
33858b53df2ff6624dd3709c06f5cc73:mushibwe7617
```

password supports all type of hash in hashkiller.co.uk databases.

if you want bypass the captcha, you can enable the DeathByCaptcha feature by click "DeathByCaptcha" button, check "Enable" radio button, then fill the username and password you have in deathbycaptcha.com. make sure your account has enough balances for bypass the captcha, if not, the program will throw an error when scanning process begin. then click "Save" button. now, the captcha will bypassed automatically.

but if you dont have deathbycaptcha account, don't check the "Enable" radio button. you must input captcha manually each 64 of the lists

Cyber4rt IND - October 17, 2015, 11:44 pm

kok pas di extract kosong pak

01010 - October 17, 2015, 11:44 pm

This is actually a really cool tool for those who need hashes cracked quickly.

Thanks for the share op!

RieqyNS13 - October 28, 2015, 6:01 am

(Oct 17, 2015 11:44 PM)Cyber4rt IND Wrote: [\[CITE\]](#) kok pas di extract kosong pakempy ? have you choose the "Format Hash" ?

if your "Input Hash" like this: username123:668b15624520233c12133ccab440af26

username:321:09e5bf96be8167aad3461d0d9da25d8a38f6f69f

then you must choose the "user:pass" in "Format Hash" section

alezgut2410 - November 14, 2015, 7:50 pm

the application was great , but now dont works the captcha, you can fix it broo

eMblaze - November 15, 2015, 4:22 am

Thanks. I'll use it.....

Grievous - November 15, 2015, 4:23 am

wow thanks for this quality tool

Activo - November 15, 2015, 5:41 am

Looks real nice, OP. Thanks.

Pls!this tool still worked ? . here the screenshot

deathbycaptcha off

Spoiler [\(Click to View\)](#)

deathbycaptcha on

Spoiler [\(Click to View\)](#)

how the tool won't work in your case ?

you try to open hashkiller.co.uk in your browser without proxies. if the site is blocked by cloudflare, maybe that's the problem ?

EmpireProxy - January 19, 2016, 6:44 pm

hello, thanks for the share it will be of much use

shadowc0de - May 7, 2016, 2:32 am

thanks for share this program :)

RieqyNS13 - July 7, 2016, 5:06 pm

tool updated. hashkiller.co.uk change max 64 hashes to 24 hashes per-submit

vardump - October 11, 2016, 6:32 am
