lhasSpooderman - July 2, 2016, 1:02 pm

The Grid View isnt working...???

SIM-1847363 - July 2, 2016, 6:49 pm

Works Fine for me. Make sure you Set the Index(ex: 0, 1, 2, 3) or it will not work, second make sure you FRefresh it when you start. I don't recommend this anymore since you can now just use a FlowLayoutPanel with the ShelfItem(its on this Thread).

lhasSpooderman - July 4, 2016, 11:53 am

how do i make so the GridView picture/button do anything... (ex: if Item1_IsClicked then blablabla) or an easier system were its easy to say what the diffrent pictures does when clicked

SIM-1847363 - July 4, 2016, 4:18 pm

I don't recommend The Grid View anymore since you can now just use a FlowLayoutPanel with the ShelfItem(its on this Thread). Plus this control is old and I don't have the time to mess with it.

EDIT:

When you imported your control and use it there is an event called:
Event Clicked(URL As String)
use that.

Vigor - July 4, 2016, 11:02 pm

How did you post two times in a row like that? Thought it was set up to not allow people to do that by combining double posts...

Grand Reserve - July 4, 2016, 11:26 pm

Devv - July 6, 2016, 3:25 pm

has anyone made a look a like to the Windows 10 container as i really like the looks of it but i use windows 8 and do not wish to upgrade just to have that

SIM-1847363 - July 6, 2016, 3:30 pm

Yes; Naywyn and AeonHack have. Recreating that Container with all the functionality that comes with it, would take some time. I would recommend PMing one of them and asking about it. I think its in the Firefox theme, idk for sure though.
