Thread: [Cancer of the Rat Section "Syriamanal" \(mostly rat section but some more too\)](#)

?!??? ??t - August 11, 2015, 2:04 pm

So i start this thread for just keeping everything in place.

there is a user called : "?Syriamanal" his old name is "Vite Haxor"

here are points why he is the cancer of the Rat Section :

-He says he is a pro ratter,he cant even spread proof here :

Spoiler ([Click to View](#))

-He says he can code c++... lets take a look here :

Spoiler ([Click to View](#))

<https://github.com/Syriamanal/AV-Killer>

now lets take a look at the source :

first of all :

why 2 source files. (AVV2.cpp,Main.cpp)

Main.cpp looks like this :

yeaaa taskkill kills all proccesses.....

now its time for AVV2.cp

-knowledge.....

Spoiler ([Click to View](#))

- FUCKING C & P !

Spoiler [\(Click to View\)](#)

so lets look at his last threads :

first think you see is : "Should I Go back to C++ and..."

and then there is : "Can someone help me transelate autoit to C++?"

so lets read the autoit think :

first of all this is c & p from one of my threads see here :

<https://hackforums.net/showthread.php?tid=4500768>

yea im his biggest friend thats why i make this thread ?

ok you think he is just some newb with c++ and want to learn some stuff but is to lazy to reseach...
isnt a smooth way to get somethink but ok....

lets take a look at the other thead : "Should I Go back to C++ And ..."

now everyone dreams come true :

ironic on Yea for sure you get a job at google without knowing on how to make a regkey in c++ but
want to work as a c++ programmer"

a good amount with no regedit
ironic off

a admin page finder really ?

Spoiler [\(Click to View\)](#)

so again and again.

i took a look at his rep and found this :

Spoiler [\(Click to View\)](#)

yeaa begs for free installs and then say a hq user yeaaa.....

i dont say you should ask for installs. I just say if you think you are a pro hax0r you should not do it

because you are a pro hax0r.
a pro hax0r knows how to spread.

may will add more about these.

(Aug 12, 2015 05:44 PM)?Syriamanal Wrote: [\[CITE\]](#) Yes i am a kid (15), I belive you should spend your time in more effectively then trying to call out a kid. One thing that must be learned is, as you have most likely heard before, age is just a number. I have met many people younger than ?Syriamanal (in this case, you) that have more intellegence than the average adult. The imprtant thing is that you cannot use age as an argument or as an excuse. Just because somebody is younger than you or older than you does not mean they know more or less than you do. It is your responsibility to back up everything you say with adequate proof. For some reason, you decided that your main argument is that you are 15, which I take as you trying to say that because of your age, you can be pardoned for your actions. You are a disgrace to all people of your age, saying that because your age is 15 you are not as intellegent as somebody else. To summarize, stop using your age as an excuse for inexperience and lack of knowledge, get the knowledge needed to back up your claims, and go to a goddamn english course already. My brain is hurting trying to even decode your slaughtered use of English grammar. Sorry for the long post.

SOSA_ - August 17, 2015, 6:53 pm

TBH I've barely done anything with c++ and I think I can use it better than this fag. ((I made a calculator) I'm better at Java)

Armada - August 17, 2015, 10:15 pm

Why the hell is this thread still open?

Your both idiots as far as I am concerned, simply for participating, or creating this thread.

Seriously with the stupidity and effort placed in this single thread, you each could have spent the time to either EDUCATE yourself on a topic you don't fully know, or have contributed an article that could have actually helped someone.?

?Genocide(X) - August 17, 2015, 10:32 pm

Your telling ME this of all people?

Yea I have no idea WTF the RAT section is like whatsoever.....?

You are going to hate WTF I have to say next, but its as simple as this:

People post "skidish" questions for a reason, they are attempting to learn something they obviously do not understand.

You asked the EXACT SAME DUMB ASS QUESTIONS TOO.

- And guess what, I did too when I was learning. (Shocker I know) But this is HOW people learn. If your so troubled by the newbie questions maybe you should go to the Lounge forum instead.

Of course people post repetitive crap around here. As humans we are by nature very self centered individuals. In our heads, no matter the persons personality, they believe their question and problem is unique, which results in lack of use of the search function, and doubling over on the same question hundreds of times. Do I like it myself? Of course not. But its HUMAN NATURE. Deal with it.

Seriously, Byte, the fact you created a thread like this speaks loudly to your maturity level.

Syriamanal Might not be some elite hacker who who knows the ins and outs of every Remote Admin on the market, but you have asked me some pretty dumb ass shit yourself. So who are you to speak about anyone else? ?

Close this shit off and lets put the effort and focus back in to actually fixing the disaster of a forum section up instead of bitching about one another.

Superman² - August 18, 2015, 6:59 am

Let's just create a subforum where kids can yell at each other in every posts & threads. Then everybody will be happy :)

Armada - August 18, 2015, 7:08 am

I find it important to note the following:

This thread is also a direct violation of Rule #1 on HF

Hack Forum Rules

1. Members are not allowed to engage in threatening behavior toward other members. This

includes flaming. Also threats to steal accounts, dox, or swat. This includes any on-site material such as posts, PMs, or profiles.

Frankly as far as I am concerned anyone who has engaged in the thread and posted against Syriamanal should be rep fucked for their involvement.

You have effectively singled a single user out and flamed them to holy hell. It accomplishes nothing, and only goes to reinforce others opinions about this community that it IS in fact "Filled with children"

This kind of shit belongs in the school yard, not a IT Security forum.

Spoiler [\(Click to View\)](#)

and then he tells me he dont care what people think about this thread ;(

queryFrequency - August 22, 2015, 1:59 pm

First of all, RATs itself is pure cancer. And this is a stupid post to make pointing to only one member here, hundreds of users here bullshit about them being knowledgeable in any programming language. Other than that, you yourself is a pretty cancerous member around here, let's take a look at some of your posts:

hackforums.net/showthread.php?tid=4914562

hackforums.net/showthread.php?tid=4696107

Those are just a few examples. You seem to judge other members without looking at yourself. I suggest you stop. And the C++ is functional, might just be copy & paste however, not at all impressive thought.

Thuggin - August 22, 2015, 2:02 pm

Its funny to see kids bullshit there knowledge but when asked about cant answer nothing and has no experience tbh its just said to see.

?I??? ??t - August 22, 2015, 2:05 pm
