Thread: [SatoshiMines : Auto convert into USD & filter live games](#)

Hash G. - August 12, 2015, 8:36 am

Hey satoshimines addicts ?,

I just finished these two scripts so I thought I'd share with you :

First script : It'll convert your balance (in bits) into the USD value when you click on "Play", "Cashout", or on the balance.

Preview: [\(Click to View\)](#)

Second script : It'll filter the live games (at the bottom of the main page) to catch a unique user.

Preview: [\(Click to View\)](#)

How to install it :You will need to install a script manager :For Firefox, use [GreaseMonkey](#).

For Chrome, use [TamperMonkey](#).

Then, just go [here for the first](#) or [here for the second](#) and click on "Install this script", and then on "Install".

If you want to review the source, just click on "See the source of the script".

If you have any ideas to improve or make new ones on satoshi, let me know.

Thanks.

Also, I don't understand the second script O.o

I'm new to this stuff.

My API is lagging as hell, I think it's due to that. :(

The second :

<https://satoshimines.com/s/25788655/3W5hw83LLN/> <- Random link to spectate a game because the live games table is larger.

You'll see all the live games with usernames.

Click toggle watching and input the username you want to watch games for.

And it'll filter all the live games to display only the games done by *username*.
