This used to be my host a while ago, knew one of the workers there and had a nice discount on my hosting. They are good and if I had any problems, they solved them for me quickly. Only negative thing about them is that they're slightly more expensive than other hosts. Must say though, the more you pay, the better quality you'll get, generally, so it's not necessarily a bad thing. With this promo code, it's cheaper and worth it.
