Thread: [IP Info Grabber](#)

Burakku Kenshi - August 13, 2015, 12:09 am

So I got a little bored after getting off xbox and I remembered how annoying it is to pull up info on an IP. I remember with Lanc it would just pop up the location but now the API isn't working anymore :/
Anyway I made a simple little program that uses an API I found online to get the info on an IP, then I also added another little button that opens <http://www.WhatIsMyIPAddress.com/ip/IPHERE> to show further details about the IP.

Here is a screenshot.

Here is the download link: <http://www.mediafire.com/download/xh86onm56h2v8ff/IP+Info.exe>

Here is a virus scan:

Just downloaded it and works perfectly fine.

And the file is clean as far as I can tell.

Look's nice I'm gonna try it out right now! thank you for the share

IHasBrains - August 13, 2015, 12:55 am

Not going to use it, but I am sure it will help other members!

atoo - August 13, 2015, 12:56 am

Pretty neat program, thanks alot man :)

Thanks. It's just a simple little thing I made to help me out so I hope it helps everyone else too.
