Thread: [Game lag + low fps](#)

Quality_k1nG - August 13, 2015, 8:10 am

Hi ,

I made this another thread because [this thread](#) having some bug thats why no one can see the replies.

So Here is my post

(Aug 11, 2015 07:51 PM)Quality_k1nG Wrote: [\[CITE\]](#) Hi bro

Can anybody help me?

I have this laptop <http://support.hp.com/in-en/document/c04410332>

OS: win 7

I was playing battlefield bad company2 on this laptop and having some constant lag

Does my hardware of laptop is enough for that gaming because it have 1.7ghz processor ? I don't know what the cause of lag so ya please help

thanks in advance.

Yes I tried playing game with minimal setting , it just up-down fps.

I just used this method <https://www.youtube.com/watch?v=kGEN7JriJ2M>

Hwinfo + rtss

and find out , my core #1 is at 72% , #2 core is at 72%, #3 core is at 47 and #4 core is at 51%

Gpu D3D usages is at 3.4%

Gpu Core load is at 99%

Please consider this thread to post replies from Now

thanks

I already tried razer booster. Its not helping though.

anyway thanks.

Sorry to hear that hope you find something that works have you tried ending processes that use a lot of the cpu?

If that laptop has Nvidia graphics, you should be able to tell it to use the Nvidia GPU within Nvidia Control Panel.

Make sure your settings look something like this.

Quality_k1nG - August 13, 2015, 6:50 pm

I tried that too , its not working though

These are the statistics while playing game

core #1 is at 72% , #2 core is at 72%, #3 core is at 47 and #4 core is at 51%

Gpu D3D usages is at 3.4%

Gpu Core load is at 99%

Why D3D usage is low?

Bump for this and just to clarify my point of post is that Game is running fine with intel graphic card but when I switched to nvidia graphics card it giving me lag and up-down fps.
