Thread: [Closed Account Color Changer](#)

Cammy - August 13, 2015, 2:43 pm

Couldn't find a script that does this (or I'm just blind) so here we go. Plain and simple.

Click [here](#) to install the script.

Before:

After:

You can edit the RGB values to your own preferences as well. Standard values are 90, 90, 90 to make the name more noticable.

Other userscripts:

['View Last Post' link on 'Your Posts' page](#)

['Rep User' link next to reputation count on threads](#)

Realizm - September 7, 2015, 6:16 pm

Thank you very much, this is actually helpful for me lol.

Cammy - September 25, 2015, 3:56 am

Bringing this back up, updated the HF URL code

SavageAF - September 25, 2015, 7:36 am

Ty, you pm'd me about this, hope it's easy to install and whatever xD

Cammy - September 25, 2015, 9:34 am

You need one of the following extensions in case you couldn't figure it out:

- ViolentMonkey (Opera)
- GreaseMonkey (Firefox)
- TamperMonkey (Chrome)

Cammy - December 20, 2015, 7:58 am

WebExender has closed and I can't get the userscript back now, I'll update this later.

Cammy - December 21, 2015, 2:47 pm

Updated thread with new link

Nachfolger - December 30, 2015, 4:53 am

Thanks for this stranger. Posting so I can install later when I'm on my pc.

Melees - January 16, 2016, 10:54 am

I'm watching you OP.... yes.

Cammy - August 28, 2016, 5:15 pm

Bump for recognition. Thing still works and I find it have saved me quite the headache of selecting an username to view the name

Meow - August 28, 2016, 5:17 pm

Pretty neat, will be sure to download it! Thanks

Granny Bacon - August 29, 2016, 5:41 am

This do indeed work. Thank you for the time saving and saving me from getting massive headache by zooming in and check what the name says...

Mr. Robot - August 29, 2016, 5:44 am

Can I ask why the before pic is so dark? Mine normally looks like the after pic.

Is that normal?

Cammy - August 29, 2016, 5:48 am

That's just how it looks on all of my computers without any userscripts enabled.

Maybe you're already running a script that takes care of the color or your screen has different brightness and contrast settings

Dark- - August 29, 2016, 5:49 am

Works like a charm, nice little script Cammy. Thanks for the share bro

B?ker - August 29, 2016, 5:50 am

Might edit this to make it red instead my self but thank you op

Clegane - August 29, 2016, 5:51 am

Thank you for this, I will be giving it a go looks pretty cool

Either way, cheers for the script.

Paxton Lynch - August 31, 2016, 10:44 am

Awesome I appreciate this. Thanks for helping out and for contributing.

Cammy - October 29, 2016, 10:42 am

Bump

lotta people getting closed lately as well might come in handy for you
