somewhat unique builds ofc we cant just build a new cheat for every customer from scratch but yes lifetime of the product which should be reeally long since it has dynamic updates.
even if i would run away the cheat keeps itself up to date.

You have a functional pSlient? I want to buy a unique build if you're ever interested. As long as out connects to no other users, that's unique enough. I could pay \$500 lifetime, plus \$100 per update or whatever is required to keep it secure. I only need VAC, CEVO and Facelt would be bonuses. I'm just really interested in your humanization.

Would it be possile to make the aimbot go from the head bone down to chest bone with natural smoothing after you've fired your gun?

The offer is if you ever get the time. I know you said you're busy.

The aimbot already sort of does that when you just pull down a little. I'm guessing that you want it to do this so you can 1 tap, or go for headshots and not wanting the rcs to pull down. With this hack I can spray down people or go for 1 taps.

Right, because all the bullets shooting the chest or head separately looks more legitimate. Sounds great, but this is the real world. If I have amazing crosshair placement (I am not saying I do, this is only an example), then this will look the most natural because the spray will begin high and end low like they usually do. You could also set it to chest with 80 smooth and 1 FOV, which of course is SO much more legit looking. (I kid)

that could be possible to do yes, but this is already non sticky aim with dynamic fov so you can pull down mouse on your own and add own mouse movement between and still rcs does its job :)

sometimes i drop like +40 frags and no ban still.

Posting here

Still deciding on which cheat to buy :/

Mr.Motivation - August 28, 2015, 4:36 am

if you're looking for long lasting cheat, you should probably get mine or other limited cheat.
but if it doesnt really matter theres alot of p2c sites, which sells monthly plans.

Dextral - August 28, 2015, 9:24 am

Looks good, might buy, but definitely would if it was monthly.

Awesome cheat, little bit of fun to run around a map shooting people while looking somewhere else.
RCS is all good for legit cheaters, alright for 'rage mode'.

Make sure you have an esp of some sort for max fun :)

SIM-2315177 - August 29, 2015, 9:21 am

Holy shit guys this cheat is amazing! You can't beat this price for unlimited access! Every gun has it's own configuration, and I look like a pro! No snapping through the walls or anything! Great cheat Himmayn

Targaryen_ - September 1, 2015, 5:05 pm

Just purchased this hack less than a day ago (I was 2nd last slot :D) and I wanted to make a short review about the hack.

Aimbot - 8/10; The aimbot is strong and legit and customizable for all weapons. I love that I can customize the aimbot from legit to rage. Would be a 10/10 if humanized aimbot is fixed though. That is the feature that I really wanted from this hack.

Triggerbot - 9/10; I used many cheats over the time (mostly P2C) but somehow they weren't as good as this one. The triggerbot can be really strong but also very legit.

All in all I am pretty satisfied. The cheat is also auto updated which is a plus. Although I'm pretty sure Himmayn isn't the original coder but whatever the hack works well anyway. Only thing needed is for the human scale and speed in humanized aimbot to be fixed ASAP.

Mr.Motivation - September 3, 2015, 11:15 am

only 1 slot left, after selling it i will close this thread.
