This is a huge work and in place of giving credits, you give your user profile.

I can't find a word in the dictionnary that can describe at which point you're such a douchbag, a stealer and useless user here.

And a multiaccounter.

- 1: I doesnt know WHO made it or ANYTHING about this menu.
- 2: Im not a multi, yesterday was Im talking to a UB3R and he told me I got 4 other accounts on my IP, thats because im sharing ip with many people in my appartment.
- 3: Im not really a stealer, douchcbag, useless user.. If I would knew who made it, I would OF COURSE write it everywhere. I just doesnt know and I dont wanna give anyone wrong credit.

So please, Tell me who made it. And I will GLADLY write it down.

EDIT: I found who made it, and I wrote him as credit OF COURSE.

I can understand you did not know who did it.

But this is not a reason to give the link to your hackforum's profile into the paste just because you know how to c&p.
