Yeah, haha. It's 41GB install size. Also they are bringing patches and updates every month to make it stable.

Played it, its so much fun! They updated the game a lot. It runs VERY smooth now, running on ULTRA settings @ 60 fps. No lag at all. I'm getting use to keyboard and mouse co trols since I don't have a controller ATM. Quite easy. I hear the story is fun, haven't tried it yet. I played online. Found 2 matches in ranked. Worth the money definitely! :)

Why not? I haven't had a single issue with it so far. With all the updates they have been having, it runs very great for me! :)

do you play with a controller? or use mouse and keyboard? i didn't think it'd be good due to it being a fighting game, Consoles have always been in my heart for them, like UFC and fight night round 4 and other games of that genre.

Nice double post, faggot.

With fighting games, it really feels much nicer to use controllers. I've not even attempted a keyboard, but I don't feel like it'd be effective.

Maybe in street fighter where pulling off combos is frame-dependant and shit but in MK not really.

yeah, in street fighter it'd be great on pc, but mkx, nicer on console cause you can play with friends.

And you can play with friends on PC..?

PC is superior to console in every way..

Yes, controller is better to play fighting games but I have been playing MKX with a Keyboard and mouse, i find it quite easy since I got use to it :) Just look at the combos and move list once in a while.

Mouse? O.o

and yeah, I'd imagine combos might be more.. "well done" with keyboard, but I feel more fluid with controllers.

Yay! You single posted!

And they don't need good PCs, just tell them to turn the graphics down.

But the way you worded it before was awful ;)

iDuL - August 21, 2015, 10:39 am

I read all the reviews before making my purchase of this game for only \$9.50. Completely understandable, shitty launch because of a shitty port and its all because of Warner Bros. No wonder they have such a good deal going on CDKeys.

I also just have a knack for buying games when they're on sale. Staying true to this matter, I've collected over 200+ games since 2010.

bitdefender7 - August 22, 2015, 4:22 pm

i wish that price is for XBOX ONE lol too expensive games for X1 and very cheap for PC

The Supreme Leader - August 22, 2015, 4:23 pm

Someone wanna buy me this? LOL.

Seriously though, that's crazy how cheap it is.

bkhaste - August 23, 2015, 8:01 pm

Yore - August 27, 2015, 6:25 am

You'll almost never see prices like this for Xbox One I can assure you that.
