Thread: [\[FREE\] Neos Downloader v1.0| A Silent Downloader for your rat](#)

Neos07 - August 15, 2015, 3:05 pm

What is Neos Downloader?

It's a tool that silently download your rat, using its direct download link.

Why using it Neos Downloader?

Because the stub has a low size and it is semi-FUD and with a simple encryption you may get it FUD.

How to make a downloader using Neos Downloader?

Just to upload your stub to a upload website that give you the direct link, then put it in the textbox and click Build.

And you got your downloader.

If you run it, it will silently download the stub and run it.

There will be any updates?

I will add many features to to the downloader as sleep and startup...

I used nodistribute and refud.me first, but I said to myself maybe they will think the program is backdoored and crypted, he didn't scan in virusscan to not lose the encryption. xD

So could someone correct me if im wrong? The stub is the finished config of your RAT, and you upload it to a website to be downloaded? After that the purpose of the program is beyond me.
Anyone got some help? I'm just trying to learn all I can.

When you upload it to a website, you get the direct link of your stub, put it in the program and build a downloader. So it has low size and it is undetectable.

no you lets say just upload your rat to media fire just the .exe then copy the link to go and download it from on media fire then paste it in the neos downloadeder program then it will give you a link or something copy that then give that one to your victim
By the way don't use media fire they will banned you or delete your .exe

Why?

Every RAT on the market has its own way to inject itself, and its 10x better to use the defined injection than a 3rd party app doing it instead.

What Neo is charging is well within line. ?

Dropping the file would mean it has to be Crypted before hand. why pay for a crypter and a downloader, why not just use a public downloader and crypt the downloader?

also 9.99 for URLDownloadToFile and CreateProcess isn't exactly ethical. injecting the PE would give it its worth.

Welcome.

Bumping this thread of this amazing free downloader.

Thanks for the awesome tool man! ?

You should release the source for this.

Nice tool bro will test this now

pls the password seem not to work for me. how do i open it mates?

Wow this is cool mate thanks for this :D

@Neos..Nice share bro, kindly pm me the password..thanks!

Bro, it means I have to bind ppi exe with stub.exe and upload to site. Then, I need to create downloader with direct link (eg. gg.com/download/stub.exe). Then I have to spread that downloader to people. When they click it, it will download stub.exe which binds ppi exe and install? Sorry for my lack of knowledge. Thanks for your downloader anyway.

is this still working? i'm interested pls

Seems cool! Could you pm me the pw?

Nice. Could you pm me the pw?

The link is down, is a new link in pm possible?

```
nnooooooooooooooooooooOoooooooooooooooo
```

You guys are only 3 years too late for a working link

EDIT: nevermind just realized when this was posted, damn grave diggers confusing me
