Hey, here the method for ya

1. Go to [instagress](#)
2. Sign up then add the Instagram account
3. on likes and comments
4. Set it to normal not fast as this will pick up as spam
5. Scroll down and remove all the spam tags like follow4follow and add tags related to the Instagram you have
6. You can add more authentic comments if you like but the ones already in place are fine.
7. If you like you can add a location so you only like pictures in that location
8. Click Start

Could you reply to the thread to keep it alive?
