Thread: [Error With HttpWebRequests](#)

raider101 - August 15, 2015, 4:01 pm

Ok, so I'm trying to code something to get information from tesco accounts for a few friends to use, but having issues. It keeps telling me I need cookies enabled. So I have looked around, said something about setting cookies from a previous visit then posting data but it didnt work. Any ideas?

Code:

```
Code Imports System.IO
Imports System.Net
Imports System.Text
```

```
Public Class Form1
```

```
    Public Shared loginCookies As CookieContainer
```

```
    Private Sub BtnStart_Click(sender As Object, e As EventArgs) Handles BtnStart.Click
        For Each account As String In ListBoxAccounts.Items
            Try
```

```
                Dim combo() As String = account.Split(":")
                Dim email As String = combo(0)
                Dim password As String = combo(1)
                Dim loginData As String =
String.Format("loginID={0}&password={1}&form=fSignin&from=&formData=bmV3UmVnPXRYdWUm
&seamlesswebtag=&confirm-signin.x=1&confirm-signin.y=1", email, password)
                Dim request As HttpWebRequest =
DirectCast(HttpWebRequest.Create("https://secure.tesco.com/register/"), HttpWebRequest)
                Dim byteArray As Byte() = Encoding.UTF8.GetBytes(loginData)
                Dim tempCookies As New CookieContainer

                request.CookieContainer = tempCookies
                request.Method = "POST"
                request.ContentType = "application/x-www-form-urlencoded"
                request.ContentLength = byteArray.Length
                request.ProtocolVersion = HttpVersion.Version11
                request.UserAgent = "Mozilla/5.0 (Windows NT 10.0; WOW64) AppleWebKit/537.36
(KHTML, like Gecko) Chrome/44.0.2403.155 Safari/537.36"
                request.Referer = "https://secure.tesco.com/register/default.aspx?vstore=0&as=f"
                request.KeepAlive = True
                request.Accept =
"text/html,application/xhtml+xml,application/xml;q=0.9,image/webp,*/*;q=0.8"
                request.AllowAutoRedirect = True
                request.Host = "secure.tesco.com:443"
                request.Timeout = 60000

                Dim postreqstream As Stream = request.GetRequestStream()
```

```
postreqstream.Write(byteArray, 0, byteArray.Length)
postreqstream.Close()
Dim postresponse As HttpWebResponse
```

```
postresponse = DirectCast(request.GetResponse(), HttpWebResponse)
tempCookies.Add(postresponse.Cookies)
loginCookies = tempCookies
Dim postreqreader As New StreamReader(postresponse.GetResponseStream())
```

```
Dim thepage As String = postreqreader.ReadToEnd
```

```
WebBrowserResponse.DocumentText = thepage
```

```
Catch ex As Exception
    MsgBox(ex.ToString)
End Try
```

```
Next
```

```
End Sub
```

```
Private Sub BtnImport_Click(sender As Object, e As EventArgs) Handles BtnImport.Click
    Dim openfile = New OpenFileDialog() With {.Filter = "Text (*.Text)|*.txt"}
    If (openfile.ShowDialog() = System.Windows.Forms.DialogResult.OK) Then
        ListBoxAccounts.Items.Clear()
        For Each line As String In File.ReadAllLines(openfile.FileName)
            ListBoxAccounts.Items.Add(line)
        Next
    End If
End Sub
```

```
End Class
```
