Thread: [Unfinished HTTP Bot](#)

SIM-297877 - August 16, 2015, 1:28 pm

Was working on this for myself but i no longer care about it.

I will admit i copied a few things and rewrote other but it was all open source.

Its current features are;

Antis

- Virtual PC
- Virtual Box
- Wireshark
- Sandboxie
- Threat Expert
- Anubis
- JoeBox
- CW Sandbox
- Netstat
- Filemon
- Procmon
- Regmon
- Cain
- Netmon
- TCP View

Advanced Mutex system

- Checks Configs Mutex
- Checks Panel for known Mutex

Download and Run

Show MessageBox

- Pain
- Error
- Warning
- Information

Open Website

Open Website Hidden

- Threaded

Install

- HKCU
- HKLM (If Admin)
- AppData (Random Folder)
- Windows (Random Folder, Random Sub-Folder) (If Admin)
- Invisible

Uninstall

Die (Close Bot)

Enable/Disable UAC if Admin

Enable/Disable Regedit if Admin

Enable/Disable TaskMgr if Admin

Change Panel Address

Dropbox File Stealer (MutliThreaded)

Botkiller (Anti Malware)

- Nanocore
- Imminent Monitor
- Luminosity Link
- BlackShades
- Basic Keyloggers, Injectors, IRCBots, RATs, Crypters

DDoS (MutliThreaded)

ARME CVE-2011-3192

UDP

Persistence(MutliThreaded)

- TempPath (Random Folder)
- Windows Path (Random Folder, Random Sub-Folder)
- Deletes old Run Registry and files

Popup System

- Adbox shows on desktop bottom right corner
- - Clicking opens ads link
- - Able to Repeat ads with a timer in Minutes
- - Have a list of ads from the panel to show (Image:Link)

Block Websites if Admin

Processes Elevation (Betabot/xRAT Style)

Make Processes Critical if Admin

- Logoff Handler
- Shutdown Handler

Things i was working on/Planning to add:

Code 'Update

'Screenshot

'Compile CodeDOM

'File corrupt

'Keylogger

'Cell Phone Pictures Stealer (Currently only Android Compatible)

'- Detect Cellphone

'- Steal from Phone

'- Steal from SD Card

'HTTP Timeout

'Add Hijacking

'Changes the host file to point most known add sites to your own add system (Built into panel + external script)

'Plugin System <http://www.dotnetheaven.com/article/reflection-in-vb.net>

'UnPn

'Reverse HTTP Proxy

'Custom

'RunPE (32 and 64)

' - Inject Downloaded File

'<https://hackforums.net/showthread.php?tid=4826868>The code is sloppy but it works, I know i will get spammed about how its all junk but i don't care about it. I a releasing it for free, and open to anyone who wants it. The panel isn't even part-way done, the bot will kinda work at this point but i don't recommend it.

Do what you want with it.

No virus scan. Its malware, its a source for a virus.

Github: <https://github.com/SaturnsVoid/VB.net-HTTP-Botnet>

If you want recognition just post it bellow, Sorry for not putting it here just forgot a few and i am REALLY lazy.

Anyways, Bring on the [flaming](#)!

YunoLawliet - August 16, 2015, 1:43 pm

Nice share, I hope someday you'll finish your project,

I know the feeling of incompleteness of not finishing a project you spent hours on.

h4arck - August 16, 2015, 6:46 pm

Im newbie on this forum.. but when i see some botnets with the feature anti-blablalba i can imagine a bug or something like that.. and when i see the function "CheckIfSandboxed"..... its very funny

Sorry by my English

NETExplorer - August 16, 2015, 9:49 pm

Fuck mega, throw this bitch on Github!

Cesar Morales - August 16, 2015, 9:51 pm

Thanks for the release. I'm sorry you didn't get to finish your project, it's a bad feeling :(

Thanks again.

SIM-1456245 - August 17, 2015, 11:10 am

Wow, on first look on the thread title, I said to my self this is another skid slap together. But this one looks very promising, well done. Looking forward to it. Keep it up.

Adderall - August 17, 2015, 11:59 am

Nice share, but there is a lack of Enter lines XD. I hope you will finish this project once GL.

denn1s - August 17, 2015, 3:04 pm

Do you have the panel sql file ?

Thanks alot

SIM-297877 - August 17, 2015, 3:15 pm

Sorry no. Its not that hard to make one by hand the table names are already there.

-Tachyon - August 17, 2015, 3:30 pm

Definitely going to have a look at this, seems interesting man thanks for the share.

denn1s - August 17, 2015, 6:32 pm

Okay well thanks anyway for the source.

Zyklon A - August 18, 2015, 3:35 am

I don't mean to shit on your release but its all copy pasted and I don't really see the point of this being released unless you want to teach other people bad coding habits and copy pasting.

If you navigate to "Panel/includes/panel.php" you will see the following code that is ripped form [here](#)

PHP Code

```
<?php
<body>
[b]<!--[/b] if you need user information, just put them into the $_SESSION variable and
output them here -->
Hey, <?php echo $_SESSION['user_name']; ?>. You are logged in.
Try to close this browser tab and open it again. Still logged in! ;)

[b]<!--[/b] because people were asking: "index.php?logout" is just my simplified form of "index.php?l
ogout=true" -->
<a href=" ../index.php?logout">Logout</a>
</body>
```

If you are ripping someones code you should at least have the decency to leave the credits.

This shows your coding (C+P) capabilities. There is no point in doing this, you could have atleast change some code instead of dumping this here.

No hard feelings, its just my view on this thread and your project.

No hard feelings, its just my view on this thread and your project.
I stated that i copyed some open source projects, but i don't remember the names or them all.
xRAT was one for the elevation system.

The PHP i was following a tutorial on how to make a secure login system as PHP is not my best language.

Your views are noted, and i am ok with this, i expected comments like this.

Crak3r2 - August 18, 2015, 1:54 pm

i do hope you finish this was looking through this thread and i can see some interesting things if you could increase the interest of this little project then maybe it could possibly be a great tool to use would love to use it one day.

Unam-schari - August 18, 2015, 2:20 pm

Haha nice dude! Iam allowed to use any functions of it?
THAAAAAANKS!!!

THAAAAAANKS!!!
Sorry:
Thanks!?

kemwelly - August 18, 2015, 2:53 pm

Your bot killer prob wont work if the file is crypted. There are better ways such as memory scanning

fLQZ - August 19, 2015, 3:00 pm

thanks for sharing, keep up doing

SIM-297877 - August 20, 2015, 3:35 pm

One star ehh.... Saw that coming.
