How to start e-whoring on KIK!

Wrote by [TheMostDopePizza](#)

Video version of installing.

eWhoring on KIK is simple, it just requires some stuff to make you look legit, today we are gonna learn how to setup KIK and make every picture look like it was taken live.

First, you need to download Bluestacks, it is available on mac osx and windows!

You can download Bluestacks on <https://www.bluestacks.com/>

Than, install it, you know how to install shit right?

1. [Picture one](#)
2. [Picture two](#)

That easy, you just installed bluestacks.

Now, you have to use the search function

[Picture three](#)

and than, from there you can search for every app you want

[Picture Four](#)

Now, you have to download the following apps

Firefox

when you download Firefox, download the following app, KIK, but don't download it from the Playstore because you can't modify kik with fake camera

Download a older KIK version [here!](#)

Now install it, looks like [this](#)

Now, make a KIK account

after you have done all above, go to the search function off Bluestacks and search for, Fake Camera

[picture six](#)

You only have to install it, it is that easy!

Than you need to get your eWhore pack,

get your ewhore pack here Spoiler [\(Click to View\)](#)

<https://hackforums.net/showthread.php?tid=4926145>

You need to directly download them from the bluestacks browser
Now, my ewhore pack is downloaded [Picture seven](#)

Now you need to download file manager
[Picture eight](#)
and then you need to download, easy unrar

Now, open file manager and browse to downloads, and move your ewhore pack to DCIM and use
easy unrar to unzip it
[Picture nine](#)

You are done, finished, now restart bluestacks!

a good tip, head over KIK settings and enable sent enter message key
[Picture ten](#)

now, You are done

Now select a pic to send to TeamKIK to see if it worked.
and then it is taken from the camera because of Fake camera

Great guide. The only things I recommend improving is the grammar, formatting, and such. I'm guessing you're not a native speaker, but there's few grammatical errors so meh. The formatting is rather awkward and weird to read on my eyes.

Like I said, other than that, great guide and this breaks down the step of installing everything with ease.
