Are you literally selling a guide on how to get slim when there are millions of those out there for free and even free supportive communities you can join ?

>inb4 keto

>inb4 start running

>inb4 motivation

Dude money making eBooks are somehow Okay but your eBook is on the same level with " get out of friend zone " which simply tells neckbeards to stop acting nice and treat women like m'ladies.

Some people need this man, not everyone can get to fitness without motivation. IE. Paying for a real working guide/ program...

Please stop. ?

Does the ebook come with a full diet plan? I may buy it just for that. Been looking to tweak mine a bit and would love to see what others are recommending.

Full diet plan, full workouts, full customization on the diet plan.

Just the diet will suffice in weight loss.

The diet is based for lowering body fat percentage while maintaining muscle.

I've received a vouch copy of the eBook.

Let me just say that there is NO magical way of losing weight just like that but this eBook is detailed and contains useful tips to lead you on your weight loss path.

The layout is simple, the font is readable.

Good luck with sales man.
