Judicious? - August 19, 2015, 7:51 pm

Status: Currently Closed. Working on getting through the requests I have.

What are the details of this service?

I'll get you full access to the account. So that you can then download backups and scan them or unlock icloud locked devices. I'll even walk you through the process of recovering the backups via site PM and in tutorial fashion.

Not every account can be compromised. If I cannot gain access I will swiftly notify you via PM.

Account password will not be changed. You'll get the info to do this on your own.

100% Transparency.

100% Anonymous. I will not share your information with anyone.

Service is provided as-is. However if you are unsatisfied with the results you have a 24 hour period of time to pm me to discuss your options for a potential refund.

What can I expect to get from this?

Full access to the account and it's information which would lead to any stored backups, etc:

Pictures

Recent Calls

Text Messages

Pictures Stored In Apps

Contacts

Pictures Sent Via Text Message

Stored Notes

Voicemails

Safari Favorites

Documents

Almost any information that could have been lost when you forgot the login and password for the account or no longer have access to the device.

A DAMN NEAR FULL DOX as well.

What information is required?

Name and location. Unless email is provided.

Obviously they have to have an icloud/apple id.

The email for the account will speed things up also if you known their birthday.

Any other information you have.

Send info via site PM

How do you accept payment?
As of right now only in BTC.

Payment is only required once I have gained access to the account. At that time I will site PM you with my bitcoin information. Once payment has shown the information will be sent to you.

What are you doing with the money you make?
Donating it back to HF.

Either way GLWS, nice service.

It's in the title and in the picture. \$25 bucks. If I can get access to the account that's all you pay.

So long as you know the email for the Apple ID. I can attempt to get the account details for you.

Yes. That's how it works. No up front cost to you because not all accounts can be compromised. If I gain access, you pay to receive the credentials. The passwords will not be changed but you will have full account information to gain access and change it yourself.

Seems like a pretty cool service, might hit you up on your offer if it still works.

BanthaTrax - September 3, 2015, 11:29 pm

Any chance that you'll accept PayPal soon or is it strictly BTC?

Donating the money back to HF? By the looks of your awards, I'm guessing you made zero sales. Lol, but if you are successful then good for you.
