Thread: [Confused on RAT](#)

beginwithme - August 20, 2015, 2:32 am

Can anyone suggest me which is the latest RAT which I can use? I am new here and a beginner

Cr?ator - August 20, 2015, 2:35 am

What are you looking for here sir, a paid rat or a free rat.

Free: <https://hackforums.net/showthread.php?tid=2632776>

Paid: <https://hackforums.net/showthread.php?tid=4822495>

ever need help?: <https://hackforums.net/showthread.php?tid=4820302>

beginwithme - August 20, 2015, 2:40 am

A Free Rat as well as Paid well also. Rats like Darkcomet and Blackshades.

I edited my post, feel free to look at those.

Incendiary. - August 20, 2015, 3:29 am

Dark Comet is outdated. Use njRat or Babylon.

Or a paid one i would not recommend Nanocore unless you plan on not doing malicious ratting, as you will get banned if you use it that way and it does not have keylogging or password recovery.

Get LuminosityLink if your looking for a paid rat.

ofc youll need a crypter for either option.

I would Highly suggest

[\[FREE\] Babylon C++ | A Native Remote Control System | Version 1.6.0.0](#) by [Gyo'](#) for a free rat

[\[FREE\] Babylon C++ | A Native Remote Control System | Version 1.6.0.0](#) by [Gyo'](#) for a free rat

As Alison stated, this is the newest previously Paid for Remote Admin tool, where the developer decided to be kind and make it now a free Remote Admin Tool.
