2. There are other methods of emulating android, bluestacks is just one of them

3. Don't gamble

4. Trash your ebooks

I've never bought an ebook and I never would :P The owner released it on freebies section for free :3

Adfly is waste of time unless you have insane traffic. I don't recommend that.

Adf.ly is just a waste of time.

OP, are you from the top ten countries in adfly list?

Those the ones that made the most money.

And are you using a dynamic ip broadband or a static ip broadband?

Thank you.
