The logo itself is pretty cool. But you should think about the typo again, it somehow looks a bit LQ to me. However, nice job dude !

The Logo in itself is pretty good but you should've worked a little more with the typo

**ipap0x28** - August 23, 2015, 7:40 am

I didn't really like the logo, it just doesn't feel unique to me and the font is awful.

**PSITICO** - August 23, 2015, 8:14 am

was more simple if you did first one side and copy to the another side, good work friend! i really like your logo

Yeah mirroring is a good technique but i tend to make things better when you do it all by step like i did within the video.

Thanks for the feedback. ?

Don't mid the negative comments, you made something out of a plain font type. Logo looks cool but needs something more.

Also you could have done all that in photoshop. ;p You did good though.
