Thread: [\[\\$4\]\[HOT!\] -- Runtime Scanner -- \[reFUD.me\]\[FAST\]\[ACCURATE\] Test your files RUNTIME](#)

Kill?Muvz - August 21, 2015, 4:16 am

UPDATE: We now have 20 AV's available!

UPDATE: Our engine is now much faster and will take 5-6 minutes per test!

reFUD.me Runtime Examination

What is this service?

[reFUD.me Runtime Scanner](#) is one of it's kind, fast, reliable and professional. The easiest way to get results.

In a nutshell, we will test the undetectability of your file against 9 of the most commonly used Anti Virus. (more will be added in the near future)

We have disabled the reporting features on all of our Anti Virus so your file remains undistributed. You can find us by clicking [HERE](#)

The process is very simple:

Purchase a Token. There are many different packages to suit all needs.

Select which Anti Virus to test against.

Enter your email address.

Click "NEXT"

Confirm your selections and enter your Token.

Click "SUBMIT"

And we're DONE! Simple, right? Now you just sit and wait for the results to be delivered to your email!

If you want names of the detections, just contact me and I will help you out.

What does it look like?

Very sexy right?

You will also receive valuable information to help you solve detections, i.e.:

Norton 360 : File executed successfully.
NOD32 : Detected before execution.
Kaspersky : File executed successfully.
Avira : File executed successfully.
Trend Micro : File executed successfully.
AVG : File executed successfully.
Avast : Detected before execution.
Malwarebytes : File executed successfully.
McAfee : File executed successfully.

How long does each scan take?

It all depends on how many Antivirus you have selected. Each will take in average 1.5 minutes. So select 1 and you should have your results within 2 minutes, or select all and wait 15 minutes!

We have a queueing system, so first come first serve. We may change it in the future and do a priority system instead.

Why should I use this?

Runtime Scanner is the fastest and most accurate way of checking the runtime FUDness of your files.

Extensive BETA testing has happened and our results are 100% accurate.

Not only will this help you understand better how your files behave in the wild, it also will prove the quality of your product in an unmanipulated way.

reFUD.me is used and trusted by thousands of people. What best to boost sales than to have proof of how good your products are?

Let's face it, if you're a developer, and you have a membership - your life will be so much easier.

P.S. The design is freaking sexy, can't ask for more professional and neat way to deliver results!

How much is this going to hurt my wallet?

At this point in time we offer 5 packages. They are as follow:

[img]http://refud.me/images/token.png[/img] [1 Scan Token - \\$4](#)

[img]http://refud.me/images/bronze.png[/img] [1 Day UNLIMITED Scans Token - \\$10](#)

[img]http://refud.me/images/silver.png[/img] [3 Days UNLIMITED Scans Token - \\$15](#)

[img]http://refud.me/images/gold.png[/img] [7 Days UNLIMITED Scans Token - \\$25](#)

[img]http://refud.me/images/diamond.png[/img] [30 Days UNLIMITED Scans Token - \\$50](#)

Other packages may be offered. If you want something to more suit your needs feel free to contacts us and we will make it happen.

We may also offer an API in which you can integrate in your online services and make some profit!

Terms Of Service:

Any attempt at bypassing/exploiting our token system will result in an ip ban and files will be distributed.

We may redo scans if you feel the results are incorrect.

There is not a guaranteed number of scans that you can do a day - it will all depend on server load.

Refunds are not given for any reason.

Tokens are not to be shared. We can easily track that and tokens may be banned if abused.

No more than 4 of your own files in the queue, wait for the results of one of them and you may submit another. This number may change at any time.

I am not responsible for any consequences, events or actions that may result from the use this service.

I reserve the right to change these Terms at any given time without notice.

You will be given the best support available as long as your communication and actions are respectful.

Cecilia - August 21, 2015, 4:19 am

Absolutely awesome scanner.

I have been helping with tests and it works flawlessly for the AV's he has on these.

You will probably see me post around a few of the scans, do purchase his service, it is worth it.

I don't do scans for people, I will do one scan per crypter (if I get bins that are DC only, with persistence) and they will have to pay for others.

I hope people buy this service, its really unique and worth it :)

Nutar - August 21, 2015, 4:31 am

I helped Killa out with his service a little bit, and I must say, the is one of a kind. I can vouch for this service and assure you that you'll never get the same experience elsewhere!

Vouch for reFUD.me Runtime Scanner & Killa again!

MafiaServ - August 21, 2015, 4:38 am

Another high quality service is been launched by a high quality member.

Vouch and Recommended.

DaPiranha - August 21, 2015, 4:58 am

Vouch for Killa on this one, good job brother!

Asentrix - August 21, 2015, 5:02 am

Vouch , I use this to test my crypts for <https://hackforums.review/>
Beautiful service , highly recommended! ?

N3oNight - August 21, 2015, 5:05 am

finally you released it killa, Great job.

Gamer222 - August 21, 2015, 5:50 am

This is extremely awesome. I hope that this service becomes a new standard for crypter sellers. You should get a sticky for this thread imo, because it's pretty revolutionary.

KeelanxHacks - August 21, 2015, 8:21 am

This will definitely come in handy, maybe some of these crypter owners can finally be exposed on their runtime claims. I hope to see these results posted along with scan time results.

GLWS

©Ratatouille™ - August 21, 2015, 9:06 am

I have tested this on beta test

Work perfect is very good idea

Very impressed

Easy to use , fast , simple

skilshotz - August 21, 2015, 11:40 am

Seems promissing, good luck with this project. Best and most used AV's are in there, I hope crypter owners are willing to use this.

Every crypter owner should put a link up in their thread to prove their quality :D

debug - August 22, 2015, 7:29 am

Huge vouch for Killa. Helped him test this out and it works great.

Kill?Muvz - August 22, 2015, 8:51 am

Thanks for all your feedback and vouches. Will buy some advertisement in some nice places soon to help bring this project to light!

Uiqueblhats - August 22, 2015, 11:28 am

Damn man you are now the new judge of crypter now most scammy crypters will come to light
You are one heck of a nice coder.

Kill?Muvz - August 22, 2015, 12:36 pm

(Aug 22, 2015 11:28 AM)Uiqueblhats Wrote: [\[CITE\]](#) Damn man you are now the new judge of crypter now most scammy crypters will come to light

You are one heck of a nice coder.

Thanks man, I just thought this would be a good idea

SIM-2434055 - August 22, 2015, 4:58 pm

Vouch for killa he threatened to kill ma

HIGH PAID FELLA - August 22, 2015, 4:59 pm

Great and unique product you offer here, I'll show this to some malware-analyser friends.

House M.D™ - August 22, 2015, 5:59 pm

VOUCH for killa he knows what he's doing code is one of a kind and unique

Kill?Muvz - August 23, 2015, 8:13 am

I pissed someone off somehow lol.

Weco - August 23, 2015, 8:32 am

Images not working for me.

Kill?Muvz - August 23, 2015, 8:58 am

(Aug 23, 2015 08:32 AM)Weco Wrote: [\[CITE\]](#) Images not working for me.
That's because we are under an attack.

(Aug 23, 2015 08:13 AM)Kill?Muvz Wrote: [\[CITE\]](#) I pissed someone off somehow lol.

you have ddos protection right?

Kill?Muvz - August 23, 2015, 11:23 am

(Aug 23, 2015 10:57 AM)House M.D™ Wrote: [\[CITE\]](#) you have ddos protection right?
Yes of course. Runtime Scanner is running fine :)

?Syria - August 23, 2015, 11:25 am

Every crypter should have this for proof they are run time fud

Kill?Muvz - August 23, 2015, 11:44 am

(Aug 23, 2015 11:25 AM)?Syriamanal Wrote: [\[CITE\]](#) Every crypter should have this for proof they are run time fud
Yes, and they should also use it to help them achieve runtime FUD.

House M.D™ - August 23, 2015, 1:57 pm

(Aug 23, 2015 11:23 AM)Kill?Muvz Wrote: [\[CITE\]](#) Yes of course. Runtime Scanner is running fine :)
plus how the hell did they get your websites ip anyways

Kill?Muvz - August 23, 2015, 2:21 pm

(Aug 23, 2015 01:57 PM)House M.D™ Wrote: [\[CITE\]](#) plus how the hell did they get your websites ip anyways
They didn't. They are only hitting the proxy, which is filtering the attack just fine!

Found out 5 of their servers, reported them, servers got shutdown at 12 AM.

LOL

Alex™ - August 24, 2015, 1:44 am

(Aug 23, 2015 02:21 PM)Kill?Muvz Wrote: [\[CITE\]](#) They didn't. They are only hitting the proxy, which

LOL

They were dosing you? What did they think that would accomplish?

If not, how did you find their servers?

Elin - August 24, 2015, 1:46 am

Looks pretty useful. I don't have any use for it rn though. Good luck with your project!

JuiceProductions - August 24, 2015, 2:06 am

Fix the images. They're broken.

Mr J Smith - August 24, 2015, 6:11 am

Tried this out yesterday but made a fatal mistake, I used an offline bitcoin wallet so the payment arrived after the transaction time ran out (used highest transaction fee as well), so don't use an offline wallet...

I will report back with my quick review after I've sorted out this problem with KillaMuvs

rezzex - August 24, 2015, 7:04 am

(Aug 24, 2015 02:06 AM)JuiceProductions Wrote: [\[CITE\]](#) Fix the images. They're broken. All reFUD.me images are broken, because the Website is under a DDoS Attack.

Kill?Muvz - August 24, 2015, 9:25 am

Images fixed. Adding MSE to the AVs and doing some other changes!

rezzex - August 24, 2015, 11:16 am

Will you implement other AVs too like Sophos and so on?

Kill?Muvz - August 24, 2015, 11:30 am

In the future I hope to have all the AVs possible but that would require a few more machines. So will only add that if we generate enough income!

MSE added, will start the service after one last test.

New results with MSE added

http://refud.me/run/results/jn5u9jydzh.png

Nutar - August 24, 2015, 1:59 pm

OMG Did you just add MSE? That's dope man, keep 'em coming! Again, Vouch for killa!

Alpis - August 24, 2015, 2:00 pm

Vouch for killa, a talented individual.

Kill?Muvz - August 24, 2015, 3:14 pm

Btw, let me know which other AVs you would like added.

So far in list are:

- BitDefender

Gamer222 - August 28, 2015, 5:56 am

Glad to see that you have added MSE. Is windows defender on windows 10/8.1/8 basically the same as MSE or do they have some differences? If they are somehow different, I would suggest adding windows defender to your AV list, because there have been quite a lot of threads with people complaining that windows defender (10) is detecting their files lately.

Kill?Muvz - August 28, 2015, 6:46 am

(Aug 28, 2015 05:56 AM)m4Ntiz Wrote: [\[CITE\]](#) Glad to see that you have added MSE. Is windows defender on windows 10/8.1/8 basically the same as MSE or do they have some differences? I didnt know that, nice to hear:)

Kill?Muvz - October 7, 2015, 4:26 pm

5 MORE AVS ADDED!Bitdefender

Bullguard

Dr Web

Panda

360 Total Security

[\[img\]http://refud.me/run/results/62uuymxpfz.png\[/img\]](http://refud.me/run/results/62uuymxpfz.png)

The next 5 will be:Comodo

Ikarus

F-PROT

QuickHeal

Emsisoft

Kill?Muvz - *October 9, 2015, 4:54 pm*

Released another 5 AVs

Also created a "Live Check" page. You can see your results as they come.

[\[IMG\]http://refud.me/run/results/vvndzemwty.png\[/IMG\]](http://refud.me/run/results/vvndzemwty.png)

An7i21 - *October 10, 2015, 3:38 pm*

The live page is awesome! thanks again killa!!

Kill?Muvz - *October 15, 2015, 3:47 pm*

We will be offline for the next few days. We greatly apologize for the inconvenience. When we are back on we will multiple any token you had by 5.

We will be back on tonight! We have deleted all our scan result pictures though, over 1m pictures - it was time to clean it.

Kill?Muvz - *October 17, 2015, 2:35 am*

We're back on! All Scantime Scanner's images have been deleted, but you can still get their BBCode :)

Kill?Muvz - *October 24, 2015, 2:38 am*

I am thinking of extending our machines and decrease the time it would take per scan. Would this be something beneficial? Because that would mean I am doubling my hosting expenses.

shustino - *October 27, 2015, 11:43 pm*

I bought runtime 7 days unlimited (27\$) but I dont' receive any token that's my payment:

<https://blockchain.info/it/tx/330dd885fa2c8239e54c91ea677b6b7d7816a22add7b0f15f2857a3bc88b99ca>

can u help me?
thank you

Blockchain has been up and down since few days. Transaction must not have been processed. Hopefully blockchain will send the request before killa gets online so that you dont wait for him... ?

shustino - October 28, 2015, 1:40 am

i need urgently runtime service, can i pay u via paypal?

HiddenEyE - October 29, 2015, 1:12 am

vouch for OP am always using your service

Pe?cil - November 7, 2015, 10:36 am

Hello.

Thanks for this service. I bought the offer "30 Days Unlimited Scan" today. Everything works fine.
Big Vouche !

1) We can read on the runtime page "NOTICE: If your file causes anything to pop up on the screen it will cause false positives" =

- So if I bind a file your runtime simulation will give a false positive but it bypass correctly for real ?
- Also, the negative detections noticed on the page keep stay negative for real even if we use a binded file, right ?

2) I know it's obvious, but a " ? " symbol mean = No detection during runtime. And a " ? " mean a detection during runtime, right ? Some people asked me, but I guess it's logic.

L

1

- If the file is like a picture or a document it might cause false detections, better to scan without a binded file.

- yes

2

- Yes that is correct

Glad you like refud.me :)

menlaxen - November 9, 2015, 8:59 am

Down for only me or everyone else? Seems like the scan is never processing.

Kill?Muvz - November 9, 2015, 10:37 am

(Nov 9, 2015 09:59 AM)menlaxen Wrote: [\[CITE\]](#) Down for only me or everyone else? Seems like the scan is never processing.
