Thread: [MLRat - Plugin based Remote administration tool || Free || Open Source](#)

BahNahNah - *August 22, 2015, 3:19 am*

This is educational use and should only be used on computers that you have permission to use MLRat. is for

Download here: [GitHub](#)

Screenshots:

Spoiler [\(Click to View\)](#)

Features:

Spoiler [\(Click to View\)](#)

To do:

- add more stuff
- Fix Remote desktop

Source: [Github](#)

N3oNight - *August 22, 2015, 4:32 am*

looks really nice, good to see you releasing series of openSource Apps.

d3agle - *August 22, 2015, 9:03 am*

I think you should continue with it :) Nonetheless, nice share.

BahNahNah - *August 22, 2015, 2:50 pm*

(Aug 22, 2015 09:03 AM)d3agle Wrote: [\[CITE\]](#) I think you should continue with it :) Nonetheless, nice share.

I will be, but i dont know if it will ever get to a usable state.

The reason i made this thread is so i could get some feedback. I still consider myself new to networking.

.cYRil. - August 25, 2015, 6:31 am

Nice share especialy when it is plugin system, thanks

Delirium™ - August 25, 2015, 10:28 am

I always love BahNahNah's contributions, this user is purely awesome! Keep it up bro :D

Serux - August 25, 2015, 10:12 pm

Do you have a hard-on for the static keyword or do you not know why OOP is used?

BahNahNah - August 26, 2015, 12:48 am

(Aug 25, 2015 10:12 PM)Serux Wrote: [\[CITE\]](#) Do you have a hard-on for the static keyword or do you not know why OOP is used?

I thought i was using static appropriately.

Where are you referring to?

camelCase - August 27, 2015, 12:58 pm

(Aug 25, 2015 10:12 PM)Serux Wrote: [\[CITE\]](#) Do you have a hard-on for the static keyword or do you not know why OOP is used?

I don't see an issue with his implementation of static. Just because it's used a lot doesn't make it incorrect? LoL.

BahNahNah - August 30, 2015, 7:47 pm

Update:

Core

- Encrypted connection
- Better stability
- plugins can add columns

MLManagement

-added registry editor

Spoiler ([Click to View](#))

Im working on making a builder for the next update. Any help updating/creating plugins is appreciated and will speed the development process, thanks.

Rhez - August 30, 2015, 10:15 pm

Thanks for this BaNahNah. I really want to know how to make that Plugin Features.

BahNahNah - August 30, 2015, 10:34 pm

(Aug 30, 2015 10:15 PM)Rhez Wrote: ([CITE](#)) Thanks for this BaNahNah. I really want to know how to make that Plugin Features.

The source is a bit messy, good luck ?

backshifted - August 31, 2015, 2:31 pm

(Aug 30, 2015 10:34 PM)BahNahNah Wrote: ([CITE](#)) The source is a bit messy, good luck ?
Need a clean up? just call in the garbage men, ill be there ;)

BahNahNah - September 1, 2015, 6:03 am

Update has been released!

- Can build stubs now!
- Cached plugins are encrypted
- Added File Explorer to MLManagement
- Added Context icon support for plugins

kemwelly - September 1, 2015, 6:14 am

Whilst you're making all these updates, I am sitting here picking fluff out my belly button.
I should get a hobby.

OT: Awesome release OP, can't wait to see 100 new rats in the marketplace.

BahNahNah - September 1, 2015, 8:11 pm

New Update.

Download [HERE](#)

- Added task manager

Spoiler ([Click to View](#))

- Added Download and execute
- Added run (hidden and normal)

Spoiler ([Click to View](#))

Armada - September 1, 2015, 8:16 pm

Looks like I have a new addition to the All RAT Thread.

Great release man, keep it up.

.cYRil - September 2, 2015, 5:37 am

It would be more interesting if you work more on plugin compiler like nano that contain plugin icon , description ...

BahNahNah - September 2, 2015, 5:41 am

(Sep 2, 2015 05:37 AM)Hellgate Wrote: [\[CITE\]](#) It would be more interesting if you work more on plugin compiler like nano that contain plugin icon , description ...

I dont see the point in an icon but description is already an option. The description, developer and name are set in the plugin, not the compiler.

.cYRil - September 2, 2015, 6:27 am

(Sep 2, 2015 05:41 AM)BahNahNah Wrote: [\[CITE\]](#) I dont see the point in an icon but description is already an option. The description, developer and name are set in the plugin, not the compiler.

I meant options like decription , author , icon , ... will be exist in plugin compiler not in plugin project

BahNahNah - September 2, 2015, 6:35 am

(Sep 2, 2015 06:27 AM)Hellgate Wrote: [\[CITE\]](#) I meant options like decription , author , icon , ... will be exist in plugin compiler not in plugin project

What would the benefit be? Why not have it part of the compiled plugin?

.cYRil - September 2, 2015, 7:05 am

(Sep 2, 2015 06:35 AM)BahNahNah Wrote: [\[CITE\]](#) What would the benefit be? Why not have it part of the compiled plugin?

it is just suggestion, you're free with your project if you don't like it don't do it

BahNahNah - September 3, 2015, 11:06 pm

MLRat v1.0.0.3 Update

[Download HERE](#)

Server Plugin Changes:

- Plugins can now disconnect clients.

General:

- Added MLMisc plugin

MLMisc:

- Added Text to speech
- Added Hide/Show taskbar
- Added Block/Allow input
- Added restart/shutdown/logout option

MLManagement:

- Added icons for some extensions in file explorer
- File explorer now shows a different icon for empty folders
- Added startup manager
- Added Clipboard manager
- Added 'Disconnect Client" Option

-Added remote console (buggy)

ZeroByte - September 4, 2015, 1:29 pm

Thanks a lot for this will take a look :)

SpookSc - September 6, 2015, 8:17 pm

Good Day,

I want to create my own RAT for my Internet Cafe using C# .Net, but the problem is I don't know where to start?

Can you give me any suggestion?

Thanks.

BahNahNah - September 6, 2015, 8:24 pm

(Sep 6, 2015 08:17 PM)SpookSc Wrote: [\[CITE\]](#) Good Day,

Can you give me any suggestion?

Thanks.

First thing would be to learn some c#.

Once you do that, have a look into sockets.

SpookSc - September 6, 2015, 8:52 pm

(Sep 6, 2015 08:24 PM)BahNahNah Wrote: [\[CITE\]](#) First thing would be to learn some c#.

Actually I already know how to use C# .Net and System.Net.Socket, but it confuse me when it comes to server to multiple client connection, and I have a poor project planning ?

My main goal is to create a RAT that can connect and manages my Internet Cafes.

Do you have any known online tutorials for RAT Development?

What RAT Feature you start developing with?

BahNahNah - September 6, 2015, 8:55 pm

What RAT Feature you start developing with?

You start with getting clients connecting. After that, because this uses plugins, i worked on the plugin system, then getting the plugins cashing and updating.

eSp0rt - September 7, 2015, 11:57 am

Nice share dude, i will check it :)

sanderele1 - September 7, 2015, 11:01 pm

Nice work BahNahNah, it looks quite nice.

One thing tho, as far as I know, the BinaryFormatter is absolutly horrible for serializing data you want to send over a network.

[BinaryFormatter vs Manual serialization](#)
[And lots of metadata](#)

In the last example, serializing one bool creates 52 bytes of metadata.

As always, I might be wrong. But just a heads up anyways.

BahNahNah - September 21, 2015, 5:01 am

As always, I might be wrong. But just a heads up anyways.I had a look but couldn't find another sterilizer that supports nested object arrays.

TERRORISST_ - September 22, 2015, 5:10 pm

(Sep 22, 2015 05:09 PM)BahNahNah Wrote: [\[CITE\]](#) Im aware that the remote desktop is terrible, thats why its disabled.

"whats the point of a checksum?" Are you serious?

The point of a checksum is so i dont need to send the entire plugin to the client every time, the checksum CHECKS if it needs an update.

Do you even understand what an md5 collision is?

BahNahNah - September 22, 2015, 5:14 pm

(Sep 22, 2015 05:10 PM)TERRORISST_ Wrote: [\[CITE\]](#) Do you even understand what an md5 collision is?

Yes, but for a checksum, its not really an issue.

TERRORISST_ - September 22, 2015, 5:16 pm

(Sep 22, 2015 05:14 PM)BahNahNah Wrote: [\[CITE\]](#) Yes, but for a checksum, its not really an issue.

No, you don't understand it otherwise you would've seen the flaw (RCE, malicious modifications)

Not good for the victims or the person using the RAT themselves.

"lets load a licensed plugin!" oh wait.

The Slayer - September 22, 2015, 5:20 pm

Nice work OP don't listen to the haters, If I still had my pc I'd help you with the remote desktop but its dead lol.

and if you guys are bitching about the md5 collisions, edit it yourself..

Oh and FYI OP hash collisions are very very bad for checksums..

tuaavolol - September 26, 2015, 1:21 pm

Nice share, Keep it up bro!

blondedude092 - September 29, 2015, 12:30 pm

I absolutely love the idea of plug-in based Rat. I will defiantly love to create some a plug-in or two for this. You should set up something for people to post their plug-ins like a nice collection for everyone to use.

Thank you for the release.

When I grabbed the source and tried to build the solution there were quite a bit of issues.

- 1) there were several of the projects which had missing references. Easily fixed.
- 2) building is in the incorrect order or there is something else going on since building fails.

Please correct these issues and re-upload.

Thank you

klash hacker - October 1, 2015, 1:10 pm

nice and good job

i will make some plugins andd add to the rat :D

BahNahNah - October 1, 2015, 3:38 pm

Thank you

I'm not sure the referencing issues can be fixed when using github.

Make sure the client executable is in MLRats resources, that is the only reason I can think why building would fail.

B FOR BADASS - October 2, 2015, 9:21 pm

I think you should continue with it :) Nonetheless, nice share.

Vagabundo Legendario - July 1, 2016, 9:02 am

nice share man , You should continue because this is really good but anyways thanks

eric2221 - July 2, 2016, 12:30 pm

Thanks for the share!-----
