You could copy paste one together that would be just as safe as a private hack and pay nothing.

(Aug 22, 2015 05:12 AM)Dark??? Wrote: [\[CITE\]](#) Ok, go do that if you are so sure you banter.
I didn't mean to make you angry ?

ParkourDude91 - August 22, 2015, 5:16 am

hes not shitposting, you really should do that.

HairyHarry - August 22, 2015, 5:17 am

Private bhop hack?

Why would you ever want that? If you use it on MM servers you risk getting OW banned.

Avia - August 22, 2015, 5:36 am

It's easy to see if somebody is using 3rd party tool for bhopping.

Since OP is an ignorant asshole, mind teaching me how to do this?

Edit: RIP nvm I know nothing about C++ or coding

Scymo - August 22, 2015, 5:41 am

I can do this for you if you want.

Not really. As long as you're not bhopping the whole map and you know how to strafe, you will be

good.

HairyHarry - August 22, 2015, 5:44 am

Must people don't know how to strafe, lel.

Actually, you can easily get banned. There is a difference between manual bhop and scripted bhop. It's easily noticeable and can get you untrusted at first. Then VAC banned. But then again, if you make it look like you fail every now and then and know how to use it. That's another story. But most people just continuously use it without failing.

Easily noticeable and untrusted are not related as far as I know.

Requoting for him because no one seems to notice him
(you're welcome)

Menalix - August 22, 2015, 7:41 am

How much \$ of BTC? Might be willing to do it.

I've used unknown2me bhop script for a loooooong time. I've never got overwatched or untrusted/vacD. You gotta be a real retard to get ow with bhop script.

Fair enough, it does prove it. Anyway I was just saying!

OffCode - August 22, 2015, 8:02 am

Why private unknow2.me undetected 3 years.
